</thead>
<tbody>
<tr>
<td>y clinical – staging completed after neoadjuvant therapy but before subsequent surgery</td>
<td>Tumor Size: ____________</td>
<td>y pathologic – staging completed after neoadjuvant therapy AND subsequent surgery</td>
</tr>
</tbody>
</table>

### Primary Tumor (T)

- **TX**: Primary tumor cannot be assessed
- **T0**: No evidence of primary tumor
- **T1**: Tumor 5 cm or less in greatest dimension, no extra-adrenal invasion
- **T2**: Tumor greater than 5 cm, no extra-adrenal invasion
- **T3**: Tumor of any size with local invasion, but not invading adjacent organs*
- **T4**: Tumor of any size with invasion of adjacent organs*

*Adjacent organs include kidney, diaphragm, great vessels, pancreas, spleen, and liver.

### Regional Lymph Nodes (N)

- **NX**: Regional lymph nodes cannot be assessed
- **N0**: No regional lymph node metastasis
- **N1**: Metastasis in regional lymph node(s)

### Distant Metastasis (M)

- **M0**: No distant metastasis (no pathologic M0; use clinical M to complete stage group)
- **M1**: Distant metastasis

## Anatomic Stage • Prognostic Groups

### Prognostic Factors (Site-Specific Factors)

#### Required for Staging: None

#### Clinically Significant:
- Tumor weight in grams: __________
- Vascular invasion: __________

### General Notes:

- For identification of special cases of TNM or pTNM classifications, the "m" suffix and "y," "r," and "a" prefixes are used. Although they do not affect the stage grouping, they indicate cases needing separate analysis.
- The "m" suffix indicates the presence of multiple primary tumors in a single site and is recorded in parentheses: pT(m)NM.

### Hospital Name/Address

### Patient Name/Information

(continued on next page)
**Histologic Grade (G) (also known as overall grade)**

**Grading system**  
- 2 grade system  
- 3 grade system  
- 4 grade system  
- No 2, 3, or 4 grade system is available

<table>

<tr>
<td>Grade IV or 4</td>
</tr>
</tbody>
</table>

**General Notes (continued):**

- **y** prefix indicates those cases in which classification is performed during or following initial multimodality therapy. The cTNM or pTNM category is identified by a "y" prefix. The ycTNM or ypTNM categorizes the extent of tumor actually present at the time of that examination. The "y" categorization is not an estimate of tumor prior to multimodality therapy.

- **r** prefix indicates a recurrent tumor when staged after a disease-free interval, and is identified by the "r" prefix: rTNM.

- **a** prefix designates the stage determined at autopsy: aTNM.

**Additional Descriptors**

- **Lymphatic Vessel Invasion (L) and Venous Invasion (V)** have been combined into Lymph-Vascular Invasion (LVI) for collection by cancer registrars. The College of American Pathologists’ (CAP) Checklist should be used as the primary source. Other sources may be used in the absence of a Checklist. Priority is given to positive results.

- **Lymph-Vascular Invasion Not Present (absent)/Not Identified**

- **Lymph-Vascular Invasion Present/Identified**

- **Not Applicable**

- **Unknown/Indeterminate**

**Residual Tumor (R)**

The absence or presence of residual tumor after treatment. In some cases treated with surgery and/or with neoadjuvant therapy there will be residual tumor at the primary site after treatment because of incomplete resection or local and regional disease that extends beyond the limit of ability of resection.

- **RX** Presence of residual tumor cannot be assessed

- **R0** No residual tumor

- **R1** Microscopic residual tumor

- **R2** Macroscopic residual tumor

**Clinical stage was used in treatment planning (describe):**

**National guidelines were used in treatment planning**  
- NCCN  
- Other (describe):

**Hospital Name/Address**  

**Patient Name/Information**
