SUNY DOWNSTATE MEDICAL CENTER Presents

2016
Celebrate
DOWNSTATE AWARDS

Saturday April 9th, 2016
Plaza Hotel NY, NY at 7:00 PM

Each year, Celebrate Downstate honors a select group of scientific, political, media, business, and philanthropic leaders whose outstanding achievements and commitment to humanitarian service have advanced medicine and transformed lives locally, nationally, and internationally – just as Downstate Medical Center does through its core missions of education, research, and patient care.
I am very pleased to welcome you to the Celebrate Downstate 2016 evening. I founded the event in 2008 with the premise that we would raise money to fund research projects. 100% of the proceeds go for this important endeavor. Each time we have held this fundraiser, we have been able to celebrate the accomplishments of many outstanding scientists, and community individuals. This year is no different.

As healthcare continues to evolve, it is important that we explore all sources of revenue stream. Private contributions help us meet our needs and I hope we can expand this effort in the future. Tonight is one such effort, but we have a long way to go. Each of you in attendance makes this evening a success.

Our honorees tonight are exceptional individuals. Dr. Eli Friedman, our faculty honoree, has had a legendary career in medicine and has made all of us at Downstate very proud. His work in renal medicine spans not only the US but the world. Dr. Jeffrey Kahn, our alumnus honoree, has had a distinguished career in pediatric infectious disease and is a director of a major children's hospital. He has been an avid supporter of Downstate and we are very pleased we could honor him. Dr. Bruce Siegel, our community honoree, is the Founder and CEO of America’s Essential Hospitals. This organization advocates for the public health care delivery systems, and we thank Dr. Siegel for his continued efforts in this area. Public hospitals remain necessary to provide care for our most vulnerable populations and we all need to advocate for the required support these institutions like ours need to survive.

So on behalf of Downstate, I want to thank you all for coming out and supporting us. Your efforts are indeed appreciated. I hope you all enjoy the evening.

Sincerely,

Douglas R. Lazzaro, MD, FACS, FAAO
April 5, 2016

SUNY Downstate Medical Center
450 Clarkson Avenue
Brooklyn, New York 11203

Dear Friends,

It is my pleasure to congratulate SUNY Downstate Medical Center on the occasion of “Celebrate Downstate 2016” highlighting a leading medical institution offering extraordinary education, research and patient care. I would also like to commend the honorees for their efforts and dedication to the organizational goals and mission.

Eli Friedman, MD
Jeffrey Kahn, MD
Bruce Siegel, MD

The efforts of the each of these individuals, on behalf of the SUNY Downstate Medical Center is commendable. Their exemplification of advancing medicine and transforming lives displays the strength of character of our great city, state and nation.

I wish the best of luck to all those involved and look forward to your continued success. In the spirit of this event today, may we go forward achieving the best for the SUNY Downstate Medical Center as they help to make our communities places where we want to live, work and raise our families.

With every best wish for a wonderful evening, I remain

Sincerely,

[Signature]

Martin J. Golden
State Senator, 22nd District
April 9, 2016

Dear Friends:

I am delighted to congratulate SUNY Downstate Medical Center and tonight’s honorees at Celebrate Downstate 2016.

SUNY Downstate Medical Center is an incredible institution and I’d like to commend all the intelligent minds there who have devoted their lives to making sure that Brooklyn has quality health care.

It is an honor for me to partner with SUNY Downstate Medical Center and I’m proud to allocate funding to help ensure that all senior citizens, men, women, and children can receive the best health services possible.

Please allow me to extend my congratulations to tonight’s honorees. These hard-working and truly gifted individuals have made substantial contributions to our society. Each dedicated honoree has accomplished incredible achievements and I hope they all enjoy this special evening.

I wish SUNY Downstate Medical Center many more years of continued accomplishment and I’d like to recognize tonight’s honorees for being awarded this acknowledgment that will last a lifetime.

Truly Yours,

Dr. Mathieu Eugene
Council Member, Chairman of Youth Services
40th District, Brooklyn
April 9, 2016

Dr. John Williams  
SUNY Downstate Medical Center  
450 Clarkson Avenue  
Brooklyn, NY 11203-2098

Dear Dr. Williams:

Brooklyn has a time-honored tradition of recognizing those organizations that promote community health and well-being through the provision of cutting-edge medical technology, innovative teaching and outstanding services for all Brooklynites. I am pleased to extend my warmest greetings to you, the Board of Trustees, staff, and supporters of SUNY Downstate Medical Center as you gather to Celebrate Downstate 2016.

Since 1860, Downstate has been an innovator in education as the first medical school in the nation to combine clinical and classroom teachings, while sharing facilities and governance with a hospital. SUNY Downstate Medical Center is the only academic medical center in Brooklyn which serves a large population of over 2.3 million people, one of the most diverse in the world. I applaud SUNY Downstate Medical Center for its commitment to providing education and opportunities for students who are interested in pursuing careers in health care and research, and for discovering new ways to improve the health and well-being of residents in our great borough. It is only fitting that Brooklyn joins with SUNY Downstate Medical Center, to recognize its ongoing mission to advance medicine and transform lives, and to honor those outstanding individuals who have supported that effort: Eli Friedman, M.D., Jeffrey Kahn, M.D., Ph.D., and Bruce Siegel, M.D.

On behalf of all 2.6 million Brooklynites, I salute and commend you, Dr. Williams for your exemplary leadership, and SUNY Downstate Medical Center for the important contributions made to this borough for over a century. I congratulate the honorees for their dedication to excellence, and all the distinguished individuals who have nobly and selflessly supported the mission of SUNY Downstate. Finally, I thank everyone present for helping us move forward as One Brooklyn.

Sincerely,

Eric L. Adams  
Brooklyn Borough President
Eli Friedman, MD, MACP, FRCP is a Distinguished Teaching Professor of Medicine, the highest academic rank conferred to SUNY faculty. Dr. Friedman earned his MD from SUNY Downstate Medical Center, and attended the Peter Bent Brigham Hospital for his internship, residency and fellowship. He then served as Lieutenant Commander in the United States Public Health Service and was recruited to Emory as Assistant Professor in the Communicable Disease Center’s Epidemic Intelligence Service before being recruited to Downstate as Assistant Professor.

He has substantially impacted the field of dialysis and participated in many of the breakthroughs in treating end-stage renal disease, including launching the first federally funded dialysis clinic and inventing a portable dialysis machine known as the “suitcase kidney.” The device gave patients dependent on dialysis the freedom to travel for the first time. Dr. Friedman has also trained and mentored leading physicians in this field, including the first African-American and women nephrologists, and served as president of two national and two international societies of nephrology.

Dr. Friedman has helped train 185 renal fellows, many of whom have gone on to prominent academic and clinical careers. Dr. Friedman has also studied kidney-transplant rates for low-income African-Americans, finding that they had a significantly smaller percentage of transplants. The editor of Strategy in Renal Failure (1978), an initial text in a new field, and several volumes recounting symposia devoted to the Diabetic Renal-Retinal Syndrome, Dr. Friedman serves on numerous national and international boards and committees. He is an advisor to the National Institutes of Health and has chaired the dialysis subcommittee of the U.S. Food and Drug Administration. He has been president of the American and International Societies for Artificial Organs, chairman of the National Kidney Foundation’s Diabetes Task Force, editor of the National Kidney Foundation Newsletter, and associate editor of the American Journal of Nephrology and the American Journal of Renal Disease.

Dr. Friedman is a forceful advocate for renal disease patients. When dialysis patients at Kings County Hospital Center formed the National Association of Patients on Hemodialysis (later broadened to include peritoneal dialysis and kidney transplant patients under its current name of the American Association of Kidney Patients), the world’s largest patient-support group, Dr. Friedman hired its first national president as a Downstate patient-affairs coordinator. Dr. Friedman has been awarded two honorary degrees and four medals from universities around the world.
Jeffrey S. Kahn, M.D., Ph.D. received his Bachelor of Science degree in Microbiology and Immunology from McGill University. He received his M.D. and a Ph.D. in Microbiology and Immunology from the State University of New York Downstate Medical Center at Brooklyn. Dr. Kahn completed his internship, residency and chief residency in Pediatrics at Yale University and the Children’s Hospital at Yale-New Haven Hospital. Dr. Kahn stayed at Yale University to complete training in Pediatric Infectious Diseases. Thereafter, he joined the faculty at Yale University in the Department of Pediatrics in the Division of Infectious Diseases. He joined the faculty of UT Southwestern Medical Center in 2009.

Dr. Kahn’s research efforts have been focused human respiratory viruses, including respiratory syncytial virus (RSV) and new emerging human viruses. His laboratory was the first or among the first laboratories in the United States to describe the epidemiology and clinical manifestations of several newly identified viruses including human metapneumovirus, coronaviruses NL63 and HKU1, human bocavirus and polyomavirus WUV. His laboratory has described the molecular epidemiology of RSV and has characterized the glycoprotein sequences, completed phylogenetic analyses and defined the biological properties (e.g. induction of cytokines and chemokines) and induced gene expression profiles (using RNA-SEQ) of many of these RSV strains in primary human cells. Dr. Kahn’s current research efforts are focuses on mapping RSV phenotypes in the viral genome.

Dr. Kahn is the Director of the Pediatric Infectious Disease and the Pediatric Infectious Diseases Fellowship Program at UT Southwestern Medical Center and the Director of Infectious Diseases at Children’s Medical Center. Dr. Kahn is the Medical Director of Research at Children’s Medical Center.
With an extensive background in health care management, policy, and public health, Siegel has the blend of experience necessary to lead America’s Essential Hospitals and its members through the changing health care landscape and into a sustainable future. The 275-member America’s Essential Hospitals is the only national organization representing hospitals committed to caring for the uninsured and other vulnerable people.

Since joining America’s Essential Hospitals in 2010, Siegel has guided the association toward realizing its strategic vision of helping members transform into integrated delivery systems and leaders in access and quality. His intimate knowledge of member needs comes in part from his direct experience as president and CEO of two member systems: New York City Health and Hospitals Corporation and Tampa General Healthcare. Just before joining America’s Essential Hospitals, Siegel served as director of the Center for Health Care Quality and professor of health policy at The George Washington University School of Public Health and Health Services. He also served as New Jersey’s commissioner of health.

Among his many accomplishments, Siegel led groundbreaking work on quality and equity with funding from the Robert Wood Johnson Foundation. He chairs the National Quality Forum board and formerly chaired the National Advisory Council for Healthcare Research and Quality. Modern Healthcare has recognized him as one of the “100 Most Influential People in Healthcare” from 2011 to 2015; one of the “50 Most Influential Physician Executives” from 2012 to 2015; and among the “Top 25 Minority Executives in Healthcare” in 2014 and 2016. He also was named one of the “50 Most Powerful People in Healthcare” by Becker’s Hospital Review in 2013 and 2014.

Siegel earned a bachelor’s degree from Princeton University, a doctor of medicine from Cornell University Medical College, and a master of public health from The Johns Hopkins University School of Hygiene and Public Health.
Natalie Pasquarella is the co-anchor for the weekend edition of “NBC 4 New York” at 6 p.m. and 11 p.m. and is a weekday reporter for NBC 4’s various newscasts.

Pasquarella joins NBC 4 from WSOC-TV in Charlotte, North Carolina, where she was a co-anchor for the weekday 5:30 p.m. and the 10 p.m. hour-long newscast. Pasquarella began her career in her hometown of Steubenville, Ohio as a news anchor, reporter and producer at WTOV-TV. Pasquarella, a graduate of Kent State University, interned at NY1 News in New York City.

While at WSOC, Pasquarella produced several in-depth investigative stories on the rise in human trafficking and the use of black tar heroin. The West Virginia Associated Press honored Pasquarella for an investigative report on sex offenders voting in public schools.

In 2011, Pasquarella traveled to Washington, D.C. to interview President Barack Obama on local-international trade issues. The following year, Pasquarella co-anchored live political coverage of the Democratic National Convention held in Charlotte, North Carolina.

One of Pasquarella’s favorite quotes to live by being from Winston Churchill, who said, “We make a living by what we get, but we make a life by what we give.” Pasquarella, who was very involved in the Charlotte community, served on the board of ‘A Child’s Place,’ an organization that worked to erase the impact of homelessness on children in schools. Pasquarella also supported the American Red Cross, Communities in Schools, Classroom Central and the Second Harvest Food Bank.

The oldest of four children, Pasquarella loves spending time with her family and enjoys travel, the theatre and baseball.

To check out Natalie’s stories and share your ideas, follow her on Facebook.

Dr. Eli A. Friedman Honored for 53 Years of Service to SUNY Downstate and Academic Medicine: Pioneer Founded First Federally Funded Dialysis Clinic; Invented ‘Suitcase Kidney’
As a Distinguished Teaching Professor of Medicine, Eli A. Friedman, MD, is an institutional asset to SUNY Downstate Medical Center and to academic medicine worldwide.

Over the course of his career, Dr. Friedman substantially impacted the field of dialysis and participated in many of the breakthroughs in treating end-stage renal disease, including launching the first federally funded dialysis clinic and inventing a portable dialysis machine known as the “suitcase kidney.” The device gave patients dependent on dialysis the freedom to travel for the first time. Dr. Friedman has also trained and mentored leading physicians in this field, including the first African-American and women nephrologists, and served as president of two national and two international societies of nephrology.

Dr. Friedman is famous for his ability to ask delving questions, and a style of teaching that pinpoints issues with razor-sharp lucidity. An outstanding clinician, Dr. Friedman has been at Downstate Medical Center since 1963. He was named one of the “Best Doctors in New York” in 1984 and 1996 by New York magazine, and one of the “Best Doctors in America” in 1996 by American Health magazine.

Dr. Friedman is a leader in medical education. He helped train 185 renal fellows, many of whom have gone on to prominent academic and clinical careers. The first African-American, Latino, and Orthodox Jewish patients to receive hemodialysis did so under Dr. Friedman’s care. Dr. Friedman has also studied kidney-transplant rates for low-income African-Americans, finding that they had a significantly smaller percentage of transplants.

The editor of Strategy in Renal Failure (1978), an initial text in a new field, and several volumes recounting symposia devoted to the Diabetic Renal-Retinal Syndrome, Dr. Friedman serves on numerous national and international boards and committees. He is an advisor to the National Institutes of Health and has chaired the dialysis subcommittee of the U.S. Food and Drug Administration. He has been president of the American and International Societies for Artificial Organs, chairman of the National Kidney Foundation’s Diabetes Task Force, editor of the National Kidney Foundation Newsletter, and associate editor of the American Journal of Nephrology and the American Journal of Renal Disease.

Dr. Friedman has throughout his career been a forceful advocate for renal disease patients. When dialysis patients at Kings County Hospital Center formed the National Association of Patients on Hemodialysis (later broadened to include peritoneal dialysis and kidney transplant patients under its current name of the American Association of Kidney Patients), the world’s largest patient-support group, Dr. Friedman hired its first national president as a Downstate patient-affairs coordinator. Dr. Friedman has been awarded two honorary degrees and four medals from universities around the world.
