PROGRAM DESCRIPTION
Kidney transplantation improves the quality of life and survival of patients with end-stage renal disease (ESRD) as compared to dialysis. Moreover, live donor kidney transplants provide better patient and allograft survival than deceased donor kidney transplants. The benefits of kidney transplantation, however, are not fully realized because of persistent shortages of kidneys: the kidney waitlist tops 100,000 while the total number of deceased and live donor kidney transplants performed annually has remained approximately 15,000, of which less than a third are live donor transplants. This educational activity aims to present updates on current status and psychosocial aspects of live kidney donation, and address unique considerations in special subsets of potential live kidney donors such as African Americans, older individuals or those with a family history of inherited kidney disease.

TARGET AUDIENCE
This symposium is designed to enhance knowledge, competence and performance of transplant surgeons, transplant coordinators, nephrologists, nephrology fellows, other dialysis care providers (administrators, dialysis nurses, physician assistants, nurse practitioners, patient care technicians, dialysis technicians) and members of community organizations so that they will become key resources to people with kidney disease and their families.

OBJECTIVES
Upon completion of this educational activity, participants should be able to:
- Understand the magnitude and likelihood of risks in pregnancy after kidney donation
- Realize best practices that optimize outcomes in kidney paired donation
- Understand psychosocial barriers to kidney donation
- Improve communication with potential donors to facilitate truly informed consent
- Apply novel approaches to expanding live kidney donation
- Characterize the strengths and gaps of available evidence on risk factors in special populations of kidney donors.

NURSES
For the purpose of recertification, the American Nurses Credentialing Center accepts AMA PRA Category 1 Credit™ issued by organizations accredited by the ACCME.

PHYSICIAN ASSISTANTS
AAPA accepts category 1 credit from AOACME. Pre- approved credit from AAFP, and AMA PRA Category 1 Credit™ from organizations accredited by the ACCME.
