**Conference Description**

Reconstructive surgery has ushered a new era in head and neck cancer treatment. Surgeons now have the ability to remove tumors previously unresectable and reconstruct the form and function of the head and neck. Accordingly, otolaryngology departments are educating residents and community physicians about the capabilities and recent advances in reconstructive head and neck surgery. This conference will address the need for increased awareness of reconstruction and changes to cancer management, faculty suggestions, and new developments.

**Target Audience:**

This course is designed for attending otolaryngologists, residents, physician assistants, nurses, and medical students.

**Learning Objectives:**

At the conclusion of this activity, participants will:

- become aware of increased utilization of free flap reconstruction
- be able to identify the various types of Moh’s reconstruction
- be exposed to new information about oromandibular reconstruction

**Accreditation Statement**

The State University of New York (SUNY) Downstate Medical Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

SUNY Downstate Medical Center designates this live activity for a maximum of 6 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Disclosure Statement**

SUNY Downstate Medical Center Office of CME (OCME) and its affiliates are committed to providing educational activities that are objective, balanced and as free of bias as possible. The OCME has established policies that will identify and resolve all conflicts of interest prior to this educational activity.
