Downstate’s Faculty Development Initiative presents:

Topic

Assessments That Matter: Beyond Knowledge and Recall of Factual Information

A firmly held belief in medical education is that assessment drives learning. Medical students adapt themselves to what they need to learn to succeed. It follows that various formats of tests foster various kinds of study, learning, and retention among medical students. The focus of this workshop is to enable faculty to consider assessment in the curriculum of SUNY Downstate in 2013 aligned with the competencies of professional practice. Participants will consider the pros and cons of various assessment methods and consider how assessments may contribute to shaping the performance of physicians in training to become better educated and more proficient doctors.

Presenter

Klara K. Papp, PhD, Associate Dean, Director of Student Assessment, College of Medicine

Date: Thursday May 10, 2012 at noon

Location: ALRC Multi function Room located in the lower level of the Medical Research Library
