Publications with downloaded data provided by the Collaborative Study on the Genetics of Alcoholism
(COGA data as part of SAGE are marked with ‘***’)

Maintained by
Sherri Fisher (Washington University in St. Louis) and
Niklas Manz (SUNY Downstate Medical Center)

Last change: 2013-04-23

Publications in 1999

Analyses of the COGA data set in one ethnic group with examinations of alternative definitions of alcoholism.
*Genet Epidemiol* 17(Suppl 1):S319-324. PMID: 10597456

Publications in 2006

Improving the power of association tests for quantitative traits in family studies.
*Genetic Epidemiology* 30:301-313.

Semiparametric variance-component models for linkage and association analyses of censored trait data.
*Genetic Epidemiology* 30:570-581.

Family-based association tests for ordinal traits adjusting for covariates.
*Genetic Epidemiology* 30(8):728-736.

Detection of genes for ordinal traits in nuclear families and a unified approach for association studies.

Publications in 2007

Linkage analysis using sex-specific recombination fractions with GENEHUNTER-MODSCORE
*Bioinformatics* 23(1):64-70.
