UNIVERSITY HOSPITAL OF BROOKLYN

Info on Herbal Medicines Now Available on the PDR Online!

We all know that herbal medicine is one of the biggest things to hit medicine in the last few years. Many consumers prefer herbal medicines because they perceive them to be safer and healthier than conventional medicine. We all know that this isn't necessarily the case and unfortunately, many health care professionals aren't that familiar with herbal medicines. To help our doctors, nurses, pharmacists, dietitians, medical students, and other health care professionals learn about herbal medicines and use this information

during their patient care activities, the hospital has now provided us with a drug information database on herbal meds.

How you access this information is very simple. You go to the hospital website and access the PDR Online.

When you reach the page asking you to type in your search term, don't enter anything and instead, click on "SEARCH BY DATABASE" in the upper right corner. Then you click on the "ALTERNATIVE MEDICINE" database and type in the name of the herbal drug you need info on.
