Long Island College Hospital,
OF BROOKLYN, NEW YORK.

THE FIRST COURSE OF LECTURES
IN THIS INSTITUTION,
WILL BE COMMENCED ON THURSDAY, MARCH 29, 1860,
AND CONTINUE SIXTEEN WEEKS.

BOARD OF REGENTS:
HON. SAMUEL SLOAN, PRESIDENT.
LIVINGSTON K. MILLER, ESQ., SECRETARY.

COUNCIL:
T. L. MASON, M. D.  
WM. H. DUDLEY, M. D.

PROFESSORS:
AUSTIN FLINT, M. D., (New-Orleans School of Medicine,) Professor of Practical Medicine and Pathology.
FRANK H. HAMILTON, M. D., (University of Buffalo,) Professor of Surgery.
JAMES D. TRASK, M. D., Professor of Obstetrics and diseases of women and children.
R. OGDEN DOREMUS, M. D., (New-York Medical College,) Professor of Chemistry and Toxicology.
JOSEPH C. HUTCHISON, M. D., Professor of Surgical Anatomy and Operative Surgery.
JOHN C. DALTON, M. D., (Coll. of Physicians and Surgeons, N. Y.) Prof. of Physiology and Microscopic Anatomy.
DE WITT C. ENOS, M. D., Professor of General and Descriptive Anatomy.
EDWIN N. CHAPMAN, M. D., Professor of Materia Medica and Therapeutics.

DEMONSTRATOR OF ANATOMY:
J. G. JOHNSON, M. D.
One design of the Regents and Council in commencing this Institution is to supply a want which has been felt and expressed by members of the medical profession, and by students, and which has hitherto not been met in the northern or middle sections of this country, namely: a medical school of the first order, which should afford the means of instruction during the later spring and early summer months. By students from the South especially, it is believed such an opportunity will be valued, combining a residence in a temperate climate, in a city beautiful, healthful and quiet, yet populous and in all essential respects metropolitan,* and remarkably easy of access, with the highest facilities for advancement in professional culture; at a season of the year which has heretofore been but little occupied with regular courses of Medical Lectures.

The Charter of the College Hospital, obtained in 1858, confers upon its corporation legal powers and privileges surpassed by those of no similar institution; and it is the purpose of its friends to render the College in every respect, at least the equal of any in the land. The well-known and eminent talent of some of the gentlemen whose names are embraced in the list of its professors, gives assurance that the Course of Instruction will meet the requirements of the advanced condition of Medical Science; and they may all be confidently regarded as peculiarly qualified to discharge the duties entrusted to them. Their efforts to promote the advancement and general welfare of students will be seconded and aided by the Council.

THE COLLEGE HOSPITAL BUILDINGS

Are most eligibly and pleasantly situated at the junction of Pacific and Henry streets, overlooking the Bay of New York and the adjacent cities. They are surrounded by ample and ornamental grounds, and are so located that access is easy to all parts of the City of Brooklyn, its Hospitals and its Dispensaries, to the Kings County Hospital, and the Hospitals and other Medical Institutions in the City of New York.

CLINIQUES.

Ample opportunities for Clinical observation and teaching are afforded in the Hospitals and Dispensaries with which Brooklyn is liberally provided, and it is the design, as indicated in the title of the institution, “College Hospital,” to give especial prominence to this, doubtless the best method of teaching.

THE OUT-DOOR DEPARTMENT

Engages the deepest interest of the Council and Faculty, and presents a means of effective Clinical Teaching within the walls of the College rarely equalled. Nearly ten thousand patients afflicted with the various forms of medical and surgical maladies, many of them requiring important surgical operations, have been treated at the Long Island College Hospital since its opening, eighteen months ago. This department will be open daily under the direction of the Faculty. Patients will be examined and prescribed for in the presence of the class, and the fullest opportunity afforded to students for the observation of disease, the practice of percussion and auscultation, the study of minor surgery, application of bandages, &c., &c. Patients who are unable to attend at the College will be assigned to the advanced members of the College Class by whom they may be treated at their residences, under the supervision of the Professors of the College and their adjutants. Obstetric cases will also be assigned to the Senior students.

BROOKLYN CITY HOSPITAL.

This Hospital, which is one of the finest and best appointed in the country, is open to medical men and students daily without charge. It has accommodations for three hundred and fifty patients, a commodious Pathological Hall, containing well arranged rooms for post mortem examinations, a Pathological Museum, and an Amphitheatre for lectures, which will accommodate an audience of between three and four hundred persons. The Hospital has also, a valuable medical, surgical, and miscellaneous Library. The Lectures at the College will be arranged so as to allow the students an opportunity of witnessing the surgical operations, the post mortem examinations and the medical and surgical practice of the house, under the supervision of the attending physicians and surgeons. Professors Hutchison and Enos belong to the corps of visiting surgeons.

KINGS COUNTY HOSPITAL.

This old and extensive charity presents abundant opportunities for the observation of disease. The lying-in department offers facilities for the study of puerperal affections of every variety. The nursery department contains patients afflicted with the various forms of infantile disease. There is also a small pox department connected with the hospital. Between two thousand and three thousand patients are annually treated in this institution. Thomas Turner, M. D., Resident Physician.

* Brooklyn contains 260,000 inhabitants, being the third city of the United States in point of population.
KINGS COUNTY LUNATIC ASYLUM.

From two hundred to three hundred patients are constantly under treatment at this Asylum, which is admirably arranged for the accommodation of the insane. Edwin R. Chapin, Resident Physician.

DISPENSARIES AND EYE AND EAR INFIRMARY.

The Brooklyn Dispensary, the Central Dispensary, and the Brooklyn Eye and Ear Infirmary provide annually for large numbers of patients, and afford a wide field for the study of a great variety of diseases. Physicians and Students are admitted daily without charge.

PRACTICAL ANATOMY.

Subjects for dissection will be abundantly supplied, and so prepared that the study of Practical Anatomy may be prosecuted with as much comfort as at colder seasons of the year. The Dissecting Room is under the charge of the Professor and Demonstrator of Anatomy. It is well ventilated and lighted, and abundantly supplied with water and other conveniences.

It is earnestly desired that every student should go through a complete course of dissection.

It is intended to make all the departments of instruction, as far as possible demonstrative. Cases of Special interest will be selected from those treated at this Institution, and from other sources, for the clinical lectures of the professors of Practical Medicine, Surgery and Obstetrics. Professor Flint will give particular attention to the Physical Examination and Diagnosis of Diseases of the Chest. The course on Physiology will be fully demonstrated by vivisections and the use of the microscope, while that on Chemistry will be illustrated by experiments of great beauty and accuracy. Experimental instruction in the examination of urine and other animal secretions will be carefully given, and all Toxicological manipulations will be abundantly demonstrated, and the students who desire it will be exercised in practising them.

REQUISITES FOR GRADUATION.

The candidate for graduation must have studied medicine for three years under the direction of a regular practitioner—must be twenty-one years of age, of good moral character, have attended two full courses of lectures of which one must be at this institution, and submit to the Faculty a thesis in his own hand-writing on some medical subject.

GRADUATION.

The examination of candidates and the ceremony of conferring the degrees will take place at the close of the term.

FEES.

Fees for the whole course, including Matriculation fee, — $100 00.

(Student are not required to take all the tickets during one session, but only for such courses as they desire.)

Single Tickets, (exclusive of matriculation fee of $5.00) each — 12 50.

Graduation Fee, — 20 00.

Demonstrator's Ticket, — 5 00.

Hospital Tickets, gratuitous.

Regular Physicians on payment of $5, (the amount of the matriculation fee,) will be admitted to all the lectures.

Good board can be obtained for from $3 to $5 per week in the vicinity of the College. Students or others desiring further information can address Dr. William H. Dudley, corner of Henry and State streets, or any member of the Council or Faculty. Students on arriving in the city can call upon Dr. Dudley, or on the Janitor, at the College, corner of Henry and Pacific streets, who will give them any necessary information and assistance.

S. S. & W. WOOD,

Having been for many years engaged in the PUBLISHING AND BOOKSELLING BUSINESS, and having devoted special attention to the

MEDICAL BRANCH,

Have accumulated a more extensive and varied Stock, as they believe, than can be found in any other store in the Union. They are prepared to import all works not to be found in this country with dispatch, and at low prices. Among the Stock now on hand may be found many richly illustrated works, with plain and colored plates, suitable for Professors and Teachers, in Pathological Anatomy, General and Embryonal Anatomy, Microscopic Anatomy; Anatomical Plates, on rollers. Marshall's Plates, nine in number, and the figures six feet high, beautifully colored, are the finest plates for lecturing purposes that are now published. Price $60. Diseases of the Eye, Diseases of the Skin, Medical Botany, Obstetrics, Diseases of the Uterus, to which are added, as soon as they appear, all the new works published in this country and in Europe. In the

SCIENTIFIC DEPARTMENT

they have lately made extensive additions, and are prepared to furnish any work that may be wanted promptly and at low prices.

Medical and Scientific Catalogues will be issued in the early part of 1869. Orders for Books, &c., will be promptly answered by return mail or express.

S. S. & W. WOOD,

399 Broadway, New York.
