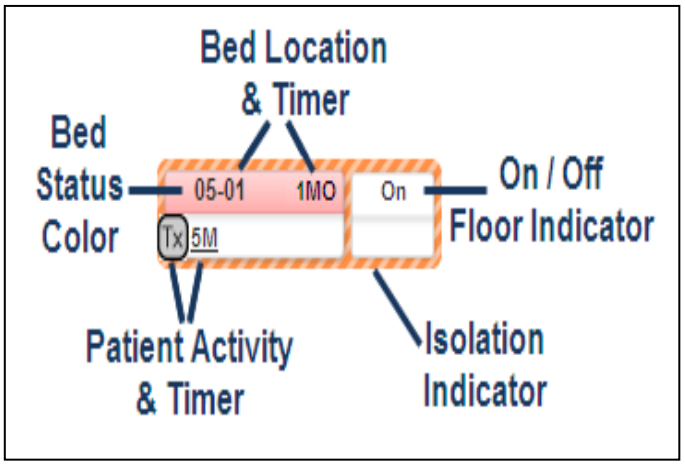
Bed Ahead

Red star indicates "Bed Ahead"



Altera DIGITAL HEALTH

QRG: BMS Worklist

Left Navigation Panel			
	**1.**	**Portal View**	Displays patients in outpatient areas such as the ER, Cath Lab, etc. that could potentially be admitted. Admission Requests can be entered from this worklist.
	2.	**Unit View**	Displays patients by the unit. This is where the room reservation for a patient is acknowledged, and where the nurse arrives the patient. Bed may also be marked as 'Bed Ahead.'
	3.	**Pre-Admission Worklist**	Displays any pre-admitted patients that could potentially be admitted.
	4.	**Bed Management Worklist**	Displays a list of patients that need a bed assignment. Suggested beds appear for each patient and the user can reserve or hold the bed for a patient. Direct admits can also be entered from this worklist.
	5.	**Bed Board**	Displays all beds in the selected organization. You can filter the list by bed status, pending requests, care level, care service, organization, and gender.
	6.	**Floor Plan**	Displays floorplans at the section level. Indicator strips appear to show room capabilities, as well as a legend for room attributes.
	7.	**Admissions Worklist**	Allows ADT activity to be reconciled with jobs in APF and completion of discharge departures.
	8.	**Closed Bed Worklist**	Displays any closed beds and allows the user to reopen a bed.
