

Moving Surgery Case from a Temporary/Virtual Room to a OR Location

1. Open the **Surgical Care** application
2. Select the case that is in the **Virtual Room**
3. Then click the **Surgical Case Details** tab

The screenshot shows the 'Allscripts Gateway | My Applications | Surgical Care' interface. The sidebar on the left has a 'My Applications' section with a 'Surgical Care' application highlighted by a red callout 1. The main content area has a 'Surgery Case List' tab selected, showing a table with columns: Date, Room, Case Provider, St, Visit ID, and Vis. A row for '03-28-2022 OR Virtual RM 1' is highlighted by a red callout 2. The 'Surgery Case Details' tab is also visible, highlighted by a red callout 3.

4. Open the **Case Header** tab
5. Type **OR** in the **Location** field
6. Select the correct **Operating Room** from the dropdown list
7. Click the **Save** icon

The screenshot shows the 'Case Header' tab selected, displaying case information for 'Case ID: 649'. The 'Location' field is highlighted by a red callout 5, and a dropdown list of operating rooms is shown, with 'OR-1' selected, highlighted by a red callout 6. The 'Case Header' tab is highlighted by a red callout 4, and the 'Save' icon is highlighted by a red callout 7.
