

**SUNY  
DOWNSTATE**  
Medical Center

University Hospital of Brooklyn

MARCH  
is National Kidney Month

**SUNY Downstate Medical Center's Division of Renal Diseases and the Center for Community Health Promotion and Wellness** in partnership with the **National Kidney Foundation®** will host an information table during **World Kidney Day (March 14, 2019)**. The patients, visitors, hospital staff, and the campus community are invited to receive valuable information about kidney disease, prevention, and the importance of regular visits to a primary care provider for routine screening in everyone with hypertension, diabetes or family history of kidney disease. Please wear **orange** on March 14th to help us raise awareness of kidney disease which affects so many people in Brooklyn. Join the movement at **#HeartYourKidneys** on Instagram, Twitter and Facebook as we turn the **Empire State Building Orange for Kidney Health!**

**Thursday, March 14, 2019**

**11:00 am - 3:00 pm**
