

Bursar Bulletin

eBilling!

Beginning Summer 2019, SUNY Downstate Medical Center is pleased to offer our students **electronic billing** notification, also known as eBill. **E-bill** is an online bill that displays the same information as traditional paper billing statements. **E-billing** allows you and your authorized user to access and securely manage your student account online. The **e-Billing** system is a more convenient way to communicate with students of any outstanding balance. Each time **an e-Bill** is generated, all students and authorized payers receive an email notification, which prompts them to log into their students' account.

- Save time - *no more waiting for the bill in the mail!*
- 24/7 access from anywhere with an Internet connection
- Secure login for students, with NETID and Password, and for authorized users, with username and password, created by the student
- Students can enable others to become authorized users to view the **e-Bill**
- Access to prior statements
- Ability to access and print the **e-Bill**
- Environmental Friendliness. **Electronic billing** allows both the University and electronic bill recipient to reduce paper usage, which is environmentally friendly.
