PROGRAM DESCRIPTION
The 2019 annual dialysis symposium will address how providers can identify and then control several external factors that are not inherent to patients’ genetic or biochemical make-up but have a larger additive effect on their outcomes.

TARGET AUDIENCE
This program is designed to enhance knowledge, competence, and performance of U.S. transplant surgeons, transplant coordinators, nephrologists, nephrology fellows, and other dialysis care providers, in cutting edge topics in kidney transplantation. Also welcome are members of the dialysis community.

OBJECTIVES
Upon completion of this activity, participants should:
☐ Be able to select the correct drugs, correct doses, and monitor the levels;
☐ Be familiar with two strategies to improve systems and processes of care that help prevent infections and monitor antibiotic usage in dialysis facilities;
☐ Be able to implement and set up processes of care such as schedule evaluation of AV access within their facility and advice when to cannulate a maturing access in a timely manner;
☐ Be able to calculate and prescribe the correct nutritional diet;
☐ Have the ability to educate their patients to read food labels correctly.

ACCREDITATION & DESIGNATION STATEMENT
The State University of New York (SUNY) Downstate Medical Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.
