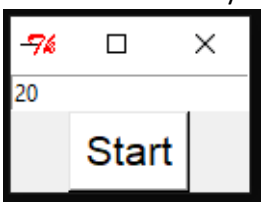
Please follow the instructions step by step.

Step 1:

For Control room Computer:

1. Open Server.exe

on the Control room computer (This station will work as server computer)
2. Do NOT click Start yet.



3. Open the Text Document named Timer_IP.
4. Run Client.exe

on the control room computer. Copy the ip address from the text document and paste it and click Connect.

Step 2:

For Hallway Station:

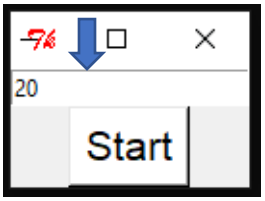
1. Open the Text Document named Timer_IP.
2. Run Client.exe

on each computer. Copy the ip address from the text document and paste it and click Connect.
3. Do this for all hallway stations.

Step 3:

Test Run:

1. Go back to Control room computer. Put a number and Click Start.



2. Check if all hallway computers have the timer running.
