

Behavioral Health Plan

The comprehensive Behavioral Health Plan will be developed by the Department of Psychiatry and will include provisions for the acute event as well as support for the needs of staff and community in the recovery phase of the event.

With respect to MCI events patients with acute behavioral health needs will be cared for in the G-building as outlined in the Department of Psychology's plan. Behavioral Health Professional, Social Workers, Chaplaincy, and Human Resource representatives will staff this area.

At the discretion of the Incident-Command Center, a "Crisis Line" will be established during specific incidents. The number will be listed and may be utilized by those who have behavioral health needs and by their concerned families.

See Department of Psychology Plan for details.
