

Child Care Support through Bright Horizons[®]

NYC Health + Hospitals has partnered with *Bright Horizons*[®] to offer child care support (ages 0-12 years) during the COVID-19 outbreak.

Bright Horizons is a nationwide network of high-quality, licensed child care centers and a network of screened, in home care givers for children. They offer **24/7 access** to find:

- Full-time child care in a **Bright Horizons[®] center**
- **At-home** child care services with screened child care providers

Child care services **are free** to NYC Health + Hospitals' active employees (including affiliate, Metroplus, Correctional Health and temporary staff) during the emergency response.

Employees also have free access to [Sittercity.com](https://www.sittercity.com), a database to find child care providers in your neighborhood. Employees are responsible to cover the costs of services offered through the Sittercity website.

Visit the [Employee Resource Center](#) home page to learn more about this program and **apply** to access Bright Horizon services starting April 15th
