The Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME)

For information about ACME accreditation, please contact the ACME office at:

8403 Colesville Road, Suite 1230

Silver Spring, MD 20910

www.midwife.org/acme

This program is registered with and approved by the New York State Education Department.

Its HEGIS code is **1203.10**.

The program registration number for the Advanced Certificate in Midwifery is **12042**. The registration number for the Master of Science Degree in Midwifery is **21570**.

Statement of Understanding*

I, _____, have read and completely understand the policies and procedures of the Midwifery Program as delineated in this Handbook.

I am aware of the additional policies, procedures, rules, and regulations of the School of Health Professions and the State University of New York (SUNY) Downstate Health Sciences University as identified in the SUNY Downstate Health Sciences University Student Handbook. I understand that I must comply with these policies in every way. I further understand that failure to comply at any time may result in disciplinary actions against me including possible dismissal from the program.

I understand that if I am a continuing student, the policies in this new Midwifery Program Student Handbook and those in the most recent version of the SUNY Downstate Health Sciences University Student Handbook supersede the policies of the previous handbooks.

Student's signature _____

Date _____

* After carefully reading and signing the above statement, please email your signed form to the Program Administrator no later than the **second Tuesday in September**. This is mandatory to continue in the program for all students

Welcome

Welcome to the SUNY Downstate Health Sciences University Midwifery Program. The midwifery faculty is committed to educating competent and compassionate midwives to serve diverse populations in a variety of health care settings. The faculty strives to provide a caring and supportive learning environment. The faculty's responsibility is to ensure that, upon successful completion of the program, each student possesses entry-level competency required for safe professional midwifery practice.

The midwifery faculty believes that open and effective communication is a key component of student success. This handbook has been developed to provide you with general program information; to familiarize you with the program philosophy, purpose, and objectives; and to inform you of policies and procedures that govern our program within the School of Health Professions (SOHP). It is your responsibility to become familiar with and abide by the information and policies described in this handbook along with the academic regulations and professional requirements published in the current *SOHP Bulletin* and the *SUNY Downstate Health Sciences University (HSU) Student Handbook* (see, specifically, the section on the School of Health Professions). Any areas pertaining to student policies not specifically delineated in this handbook are found in the current *HSU Student Handbook*.

SUNY Downstate and the Midwifery Program reserve the right to alter the existing rules and regulations and the Midwifery Program of Study as deemed necessary by the institution, school, or program. SUNY Downstate expressly reserves the right, whenever deemed advisable to: 1) change or modify its schedule of tuition and fees; 2) withdraw, cancel, reschedule, or modify any course, program of study, degree, or any requirement or policy in connection with the foregoing; and 3) change or modify any academic or other policy. Written notification will be provided to all students regarding any change.

The Midwifery Program and SUNY Downstate must respond to national or global emergencies as appropriate and at times with limited advanced notice. This may require alteration of course sequencing, course schedules, delivery of course materials, assignments to clinical rotations, graduation dates, and/or other appropriate adjustments. We recognize that in such circumstances, changes may not be optimal. The faculty will do everything it can to communicate such changes, maintain open communication with all students during such changes, and limit disruptions to the extent possible.

Essential changes including those noted in the previous paragraph concerning new academic regulations, policies, or programs will be published in one or more of the following: e-mails, memos, newsletters, program webpage, the program's Learning Management System, or other University publications. It is the responsibility of each student to ascertain current information that pertains to the individual's program, particularly regarding satisfaction of degree requirements by consultation with the student's advisor, the student's program faculty and/or staff, the Office of the Dean of the School of Health Professions, the Office of Student Affairs, the Office of the Registrar, and/or other offices as appropriate.

Updated copies of all regulations, course offerings, and specific program policies are available for review in the

SUNY Downstate Health Sciences University Midwifery Program Student Handbook 2023-2024

respective program office, SOHP Dean's Office, and in the Office of Student Affairs.

Although the Midwifery Program adheres to the School's published academic calendar, some modifications may be required in order to meet academic and/or clinical scheduling needs. These modifications are made to ensure that students have maximal opportunity to fulfill academic and clinical course objectives. Students will be given advanced notification of deviations from the published academic calendar.

Each student is responsible for obtaining current information that pertains to individual programs of study, particularly with regard to satisfaction of degree requirements. Students are strongly encouraged to refer to the *SUNY Downstate Health Sciences University Student Handbook*, other university publications, and/or consult with their Midwifery Program faculty advisor, the Office of the Dean, the Office of Student Affairs, and/or other offices as appropriate.

Specific policies relating to the joint program with the College of Nursing (Advanced Certificate in Midwifery/Masters in Nurse-Midwifery), for students who are currently matriculated in that program in the graduating classes of 2022 and 2023 are delineated in the Midwifery Program Student Handbook 2020-2021, available on request from the faculty.

The faculty looks forward to developing a rewarding partnership with students and will assist them in the pursuit of their academic and professional goals. All students are assigned a faculty advisor to help with this process. These assignments are distributed at the Midwifery Program orientation. We ask that students make an appointment with their faculty advisor to discuss any questions or concerns they have following review of this handbook. The faculty welcomes student suggestions and feedback.

Mission/Vision/Values Statements

State University of New York (SUNY) Downstate Health Sciences University

Mission:

- To provide outstanding education for physicians, scientists, nurses, and other healthcare professionals.
- To advance knowledge through cutting edge research and translate it into practice.
- To care for and improve the lives of our globally diverse communities.
- To foster an environment that embraces cultural diversity.

Vision:

SUNY Downstate will be nationally recognized for improving people's lives by providing excellent education for healthcare professionals, advancing research in biomedical science, health care and public health, and delivering the highest quality, patient-centered care.

Values:

P R I D E - To take satisfaction in the work we do every day, and to value our collective contributions to the Downstate community.

P r o f e s s i o n a l i s m - We commit to the highest standards of ethical behavior and exemplary performance in education, research, and patient care

R e s p e c t - We value the contributions, ideas and opinions of our students, coworkers, colleagues, patients and partnering organizations

I n n o v a t i o n - We research and develop new and creative approaches and services for the anticipated changes in healthcare

D i v e r s i t y - We embrace our rich diversity and commit to an inclusive and nurturing environment

E x c e l l e n c e - We commit to providing the highest quality of education and service to our students, patients, and community by holding ourselves, our coworkers, and our leaders to high standards of performance

<https://www.downstate.edu/about/our-mission.html>

School of Health Professions

Mission

The mission of the School of Health Professions is to educate health professionals in the delivery of excellent health-care service by developing their scientific competence and fostering their humane spirit. The School seeks to accomplish this by providing a challenging and supportive atmosphere for learning that offers opportunities for structured experiences as well as independent inquiry. Faculty contribute to knowledge in allied health through

advancements in clinical practice, scholarly activities, and basic and applied research. Collaboration is emphasized among students, faculty, clinicians, and professionals in health care and related disciplines. Students are prepared for professional leadership roles through course work and professional and campus activities. The School fosters ongoing professional growth by sponsoring continuing education opportunities in several disciplines. The School strives to serve the urban community in which it is located by providing health services and education to the population.

Vision

SOHP programs share the common goal of becoming nationally recognized, producing graduates who are leaders in advancing the practice of their respective fields. Every program aims to have graduates proficient at responding to the healthcare needs of diverse service recipients in different medical settings and the communities they serve.

Values

- OHP curricula are designed to support the needs and expectations of stakeholders including students, graduates, faculty, sponsor administrations, employers, physicians, and the public while meeting nationally accepted standards.
- Respect for the rights and dignities of individuals is a critical characteristic of a competent healthcare professional and should be a central concern in the learning environment.
- Programs urge students to adhere to the Codes of Ethics of their corresponding professions.
- SOHP programs aim to have a diverse student body that includes underrepresented people.
- SOHP programs commonly foster a sense of responsibility, professionalism and commitment to life-long learning in their students.

Diversity Statement

The School of Health Professions (SOHP) embraces a culture of diversity and inclusiveness throughout its educational community. We are committed to building and fostering a diverse workforce that reflects the community we serve. We value individual differences and work to ensure that an individual's difference and/or disadvantage does not impede intellectual or professional achievement regardless of gender/gender identity, sexual orientation, disability, religion, race, ethnicity, socioeconomic status, nationality, and other culture-influencing characteristics.

To promote diversity, equity, and inclusion, SOHP will:

1. Improve the cultural diversity of the matriculating student body, faculty and staff through the implementation of more culturally relevant recruitment and retention strategies,
2. Facilitate awareness by infusing cultural diversity and health inequities, as well as disability disparities content into all SOHP program curricula,
3. Infuse content on evidence-based care for culturally diverse populations in all SOHP program curricula, and
4. Improve interaction with culturally diverse Brooklyn communities through culturally humble and

respectful community engagement strategies and interprofessional collaboration and partnerships.

Philosophy of Care of the American College of Nurse-Midwives (ACNM)

We, the midwives of the American College of Nurse-Midwives, affirm the power and strength of women and the importance of their health in the well-being of families, communities, and nations. We believe in the basic human rights of all persons, recognizing that women often incur an undue burden of risk when these rights are violated.

We believe every person has a right to:

- Equitable, ethical, accessible quality health care that promotes healing and health
- Health care that respects human dignity, individuality, and diversity among groups
- Complete and accurate information to make informed health care decisions
- Self-determination and active participation in health care decisions
- Involvement of a woman's designated family members, to the extent desired, in all health care experiences

We believe the best model of health care for a woman and her family:

- Promotes a continuous and compassionate partnership
- Acknowledges a person's life experience and knowledge
- Includes individualized methods of care and healing guided by the best evidence available
- Involves therapeutic use of human presence and skillful communication

We honor the normalcy of women's lifecycle events. We believe in:

- Watchful waiting and non-intervention in normal processes
- Appropriate use of interventions and technology for current and potential health problems
- Consultation, collaboration, and referral with other members of the health care team as needed to provide optimal health care

We affirm that midwifery care incorporates these qualities and that women's health care needs are well served through midwifery care.

Finally, we value formal education, lifelong individual learning, and the development and application of research to guide ethical and competent midwifery practice. These beliefs and values provide the foundation for commitment to individual and collective leadership at the community, state, national and international level to improve the health of women and their families worldwide.

Code of Ethics of The American College of Nurse-Midwives (ACNM)

Certified nurse-midwives (CNMs) and certified midwives (CMs) have three ethical mandates in achieving the mission of midwifery to promote the health and well-being of women and newborns within their families and communities. The first mandate is directed toward the individual women and their families for whom the midwives provide care, the second mandate is to a broader audience for the “public good” for the benefit of all women and their families, and the third mandate is to the profession of midwifery to assure its integrity and in turn its ability to fulfill the mission of midwifery.

Midwives in all aspects of professional relationships will:

1. Respect basic human rights and the dignity of all persons.
2. Respect their own self-worth, dignity, and professional integrity.

Midwives in all aspects of their professional practice will:

3. Develop a partnership with the woman, in which each share relevant information that leads to informed decision-making, consent to an evolving plan of care, and acceptance of responsibility for the outcome of their choices.
4. Act without discrimination based on factors such as age, gender, race, ethnicity, religion, lifestyle, sexual orientation, socioeconomic status, disability, or nature of the health problem.
5. Provide an environment where privacy is protected and in which all pertinent information is shared without bias, coercion, or deception.
6. Maintain confidentiality except where disclosure is mandated by law.
7. Maintain the necessary knowledge, skills and behaviors needed for competence.
8. Protect women, their families, and colleagues from harmful, unethical, and incompetent practices by taking appropriate action that may include reporting as mandated by law.

Midwives as members of a profession will:

9. Promote, advocate for, and strive to protect the rights, health, and well-being of women, families, and communities.
10. Promote just distribution of resources and equity in access to quality health services.
11. Promote and support the education of midwifery students and peers, standards of practice, research and policies that enhance the health of women, families, and communities.

American College of Nurse-Midwives (ACNM) Position Statement on Fatigue, Sleep Deprivation & Safety

If not addressed, fatigue, sleep deprivation, and long periods of on-duty time can present potential safety risks for midwives, midwifery students, and the women and families for whom they provide care. The American College of Nurse-Midwives (ACNM) and its members are committed to providing safe, ethical, and high-quality care for women and infants. To achieve this commitment, it is the position of the American College of Nurse-Midwives (ACNM) that:

- Midwives have a professional responsibility to be aware of the effects of sleep deprivation on clinical and personal safety and take steps to limit those effects as suggested below.
- Midwives and midwifery services have a responsibility to create and use strategies to address and minimize sleep deprivation through which personal, physical, and mental/cognitive limitations are acknowledged. These strategies should take into account acute issues (e.g., prolonged wakefulness during labor support) and chronic issues (e.g., call schedules and staffing patterns) to minimize the risks of sleep deprivation.
- Midwives should plan a rest period after 16 hours of continued wakefulness and be aware that the urge to sleep is strongest between 3AM and 5AM.
- Midwives are encouraged to schedule 7 hours of uninterrupted sleep on a regular basis.
- Midwives who are sleep deprived or feel drowsy are advised to take naps before operating motor vehicles.

In recognition that practicing student midwives are also learners, it is the position of ACNM that midwifery students should be well-rested before scheduled call times, have a period of 4 hours of uninterrupted rest after 16 hours of active on-duty time, and/or take rest breaks before working more than 16 hours.

<https://www.midwife.org/acnm/files/ACNMLibraryData/UPLOADFILENAME/000000000306/Sleep-Guidelines-04-07-17.pdf>

Midwifery Program Philosophy

1. Midwifery care respects the unique physical, emotional, social, and cultural characteristics of each individual and recognizes the strength and power of women.
2. Midwifery care is based on a partnership with individuals, acknowledging the therapeutic value of compassion, continuity of care, human presence, and communication that demonstrate cultural humility and respect and provide for cultural safety in all care encounters.
3. Midwifery care fosters the belief that pregnancy and birth are normal physiologic processes to be respected and supported.
4. Midwifery care fosters the belief that all life cycle stages and transitions are normal physiologic processes.
5. Midwifery care supports non-intervention in physiologic processes and judicious use of intervention and technology when necessary to ensure healthy outcomes for patients and recognizes that care must be individualized and based on the best available evidence.
6. Midwifery care emphasizes health promotion and disease prevention and recognizes that these must be relevant to each person's life experiences and knowledge and must be offered in a health care system that is equitable, accessible, and ethical.
7. Midwives provide education and counseling with which individuals can make informed decisions thereby assuming responsibility for their health and the health of their newborns.
8. Midwives serve as advocates for all individuals within the health care system and, within the struggle for basic human rights and social justice, recognize that the violation of the rights of any group violates the rights of all people.
9. Midwifery care is family-centered and strives to involve the patient's significant others in the delivery of care as the patient chooses and deems appropriate.
10. Midwives recognize the potential transformative aspects of pregnancy and the childbirth experience and use these opportunities for enhancing the individual's self-esteem, health, and personal growth.
11. Midwives incorporate a public health perspective into all care, recognizing that each person's health contributes to family, community, national, and global health.
12. Midwives utilize an understanding of social determinants of health to provide high-quality care to all persons, including those from underserved and underrepresented communities.
13. Midwives provide safe and effective care across settings, including home, birth center, hospital, and other care settings for maternity and other services.
14. Midwifery is an independent health profession possessing its own core of knowledge, skills, and competencies, yet midwives recognize the need for consultation and collaboration with other health care team members and referral as appropriate.
15. Midwifery recognizes the importance of confidentiality and respect for privacy in all health care encounters.
16. Midwifery education recognizes that education and continuing competency are lifelong pursuits and therefore the faculty is committed to providing opportunities for professional advancement for students and midwives.
17. Midwifery education recognizes that adult students are responsible for their own learning and therefore the faculty provides a climate that facilitates the acquisition of knowledge and skills essential to safe clinical practice while respecting individual learning styles and differences.
18. Midwifery education promotes community service.
19. Midwifery education promotes professional role development that mandates an appreciation for global health care policy, assessment of the health of communities, and participation in teaching.
20. Midwifery education, practice, and research are based upon ethical principles.

21. Midwifery supports anti-racism in all students' educational experiences including in the classroom and clinical sites.
22. Midwifery education is enhanced through diversity of students and faculty.
23. Individuals from a variety of educational and experiential backgrounds can be comparably prepared to enter the profession of midwifery as safe beginning practitioners.
24. Faculty members contribute to knowledge in the health professions through advancements in clinical practice; scholarly activities; basic and applied research; and professional service.

Revised & updated by midwifery faculty on 6/28/22

Midwifery Beliefs on Learning

1. Learning is a self-directed process for which the adult learner assumes primary responsibility.
2. The role of the midwifery faculty includes providing resources and support to facilitate student learning.
3. Individual faculty members differ in teaching styles. Students can benefit from exposure to a variety of approaches, both in the classroom and clinical settings.
4. Evaluation is part of the learning process. Learning is facilitated by reinforcement and constructive feedback from others.
5. Students are responsible for self-evaluation, a critical component of the learning process. Students are responsible for communication of learning needs to core (academic) and clinical faculty.
6. In clinical practice, it is the responsibility of the faculty to maintain boundaries of safety and it is the responsibility of the learner to respect those boundaries.
7. Learning is facilitated by a variety of instructional modalities and interprofessional approaches.

Revised & updated by midwifery faculty on 6/28/22

Midwifery Program Purpose

The purpose of the Program is to graduate safe, beginning midwives. This is accomplished by assisting each student to:

1. acquire depth and breadth of midwifery and related theory
2. acquire competence in the performance of midwifery skills
3. apply theoretical knowledge, including evidence-based research, to clinical practice
4. utilize the midwifery management process in all aspects of midwifery care
5. become a culturally humble and respectful primary health care provider

Midwifery Program Outcomes

The program offers qualified post-baccalaureate students the opportunity to become safe beginning Certified Nurse-Midwives (CNMs) and Certified Midwives (CMs) who are able to:

1. Provide primary health care, encompassing gynecologic, reproductive and sexual, health care, from adolescence through post-menopause.
2. Recognize the role midwives play in caring for transgender and gender non-conforming individuals (TGNC).
3. Recognize and support normal physical, psychological, emotional, social, and behavioral development, including growth and development related to gender identity, sexual development, sexuality, and sexual orientation.

4. Manage the care of essentially healthy women and other people during pregnancy, labor and birth, and the postpartum period.
5. Monitor fetal growth and well-being during the prenatal and intrapartal periods.
6. Assess the neonate's adaptation to extrauterine life and initiate resuscitative measures when appropriate.
7. Perform comprehensive neonatal assessment, facilitate the newborn's integration into the family, and provide anticipatory guidance related to infant care.
8. Manage collaboratively the care of individuals with selected obstetric and/or medical complications and make appropriate referrals.
9. Provide emergency care as appropriate.
10. Analyze the impact on health care delivery systems and the practice of midwifery health care of policies, legislation, social justice, racism, and social determinants of health.
11. Apply leadership, management, and teaching/learning theories to effect change within the health care delivery system for the betterment of service.
12. Assess the needs of communities and promote changes in health care delivery that are responsive to the needs of populations, with a focus on the underserved.
13. Interpret, evaluate, and apply research studies relevant to reproductive health care and midwifery practice.
14. Analyze the role of research in promoting the advancement of midwifery education, practice, health, and health care.

Midwifery Program Statement on Discriminatory and Abusive Behavior

The faculty does not tolerate harassment, disrespect, or abuse of students, patients, support persons, families, or staff, including, but not limited to, racist or sexual harassment or abuse.

For the institution's policies on such conduct, please refer to the Office of Diversity and Inclusion's webpage: <https://www.downstate.edu/about/our-administration/diversity/office-of-diversity-inclusion/policies/index.htm>

In addition, per President Wayne J. Riley:

If you feel unsafe, experience acts of harassment, discrimination, or observe vandalism on the campus:

- DO immediately call University Police at X2626 or 911 if there are any safety threats to you or your fellow students.
- DO document the incident. If you discover graffiti such as anti-Semitic speech or posters, please call University Police at X2626 to file an incident report.
- DO report the incident to a campus authority as a bias incident. Even if campus security determines that the action was not illegal, a report of the incident ensures follow-up.

Further, any individual who believes he/she (sic) has experienced discrimination should immediately contact the Office of Diversity and Inclusion at (718) 270-1738. You may also email ODI at AskODI@Downstate.edu.

You may also reach out to the Office of Student Life & Services at (718) 270-2187 or email studentaffairs@downstate.edu. All calls and emails are kept confidential.

Midwifery Education Minimal Technical Standards for Admission and Continuation

Introduction

Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act require that no qualified individual with a disability shall, by reason of such disability, be excluded from participation in or denied the benefits of SUNY Downstate Health Sciences University's services, programs or activities or be subjected to discrimination by SUNY Downstate.

The term "qualified individual with a disability," means an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or for participation in programs or activities.

The Committee on Admissions and Academic Standing does not discriminate against qualified individuals with disabilities. Students must be able to perform the essential functions of the program in order to meet certain minimum academic and technical standards. In carrying out their functions, the Committee is guided by the technical standards necessary for admissions, continuance, and successful completion of the program.

Technical Standards

The purpose of the Midwifery Program at Downstate Health Sciences University is to graduate safe, beginning midwives. This is accomplished by assisting each student to:

- acquire depth and breadth of midwifery and related theory
- acquire competence in the performance of midwifery skills
- apply theoretical knowledge, including evidence-based research, to clinical practice
- utilize the midwifery management process in all aspects of midwifery care
- Promote, advocate for, and strive to protect the rights, health, and well-being of women, families, and communities.
- Promote just distribution of resources and equity in access to quality health services.
-

Students are required to successfully complete both the academic and clinical requirements of the program to receive the MS degree in Midwifery or Advanced Certificate in Midwifery. In order to carry out the activities described below, candidates for the MS or the Advanced Certificate must be able to consistently, quickly, and accurately learn, integrate, analyze, and synthesize data. The activities described below are the technical standards necessary to complete the Midwifery Program and to perform as a safe beginning midwife.

A candidate for a Midwifery degree or the Advanced Certificate must have abilities, attributes, and skills in five major areas: 1) Observation, 2) Communication, 3) Motor Coordination, 4) Intellectual, including conceptual, integrative, and quantitative abilities, and 5) Behavioral and Social. Performing in a reasonably independent manner is an essential function of the program and profession.

1. Observation

Students must have sufficient vision to be able to observe demonstrations, experiments, and laboratory exercises in the basic sciences. They must be able to observe a patient accurately at close range and at a distance, be able to obtain an appropriate medical history directly from the patient or guardian and observe digital and waveform readings and other graphic images to determine a patient's condition. Students must be able to perceive the signs of disease and infection through visual inspection, palpation of changes in various organs and tissues, such as the

uterus, ovaries, and pelvic adnexal area and auscultation of sounds such as those of the heart, lungs, and bowel. Such observation necessitates the functional use of vision, hearing and other sensory modalities.

2. Communication

Students should be able to communicate, understand and observe patients in order to elicit information, examine patients, describe changes in mood, activity and posture, and perceive nonverbal communications. They must be able to communicate effectively and sensitively with patients. Communication includes not only speech but also reading and writing. Students must also be able to communicate effectively and efficiently in oral, written, and electronic form with all members of the health care team to convey information for safe and effective care.

3. Motor Coordination

Students should be sufficiently mobile to execute movements required to provide general care and emergency treatment to patients. Students should be able to do basic screening and examination procedures, including but not limited to physiological measures such as heart rate and respiration; palpation; percussion; and auscultation. They should be sufficiently mobile and possess the eye-hand coordination and motor strength, to execute movements required to provide general treatment of patients (including transfers) and provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of midwives are cardiopulmonary resuscitation, the application of pressure to stop bleeding, and the performance of maneuvers to manage shoulder dystocia in a rapid manner. Additionally, students must be able to perform the maneuvers involved in vaginal assessment in labor, delivery, and suturing. Such actions require coordination of both gross and fine muscle movements and functional use of the senses of touch and vision.

4. Intellectual - conceptual, integrative, and quantitative abilities

These abilities include measurement, calculation, memorization, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of midwives, requires all these intellectual abilities. In addition, students should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

5. Behavioral and Social

Students must be able to fully utilize their intellectual abilities, exercise good judgment, promptly complete all responsibilities attendant to the diagnosis and care of patients, and develop mature, sensitive, and effective relationships with patients. Students must be able to adapt to changing environments, to display flexibility and to learn to function in the face of uncertainties inherent in the clinical problems of many patients.

The student must be able to experience empathy for the situations and circumstances of others and communicate that empathy. Compassion, integrity, concern for others from all levels of society, respect for human diversity, interpersonal skills, interest, and motivation are all personal qualities that are assessed during the admissions and educational process.

Conclusion

The SUNY Downstate Health Sciences University Midwifery Program and its sponsoring institution will attempt to develop creative ways of opening the Program to competitive, qualified individuals with disabilities. In doing so, however, the Program and sponsoring institution must maintain the integrity of the curriculum and preserve those elements deemed essential to the education of a Midwife. The Program and sponsoring institution cannot compromise the health and safety of patients. An applicant or student who is unable to meet the minimum academic and technical standards is not qualified for the practice of the profession.

Reaffirmed by Midwifery faculty June 2022

General Information

Program Office & Classroom Locations

The SUNY Downstate Health Sciences University Midwifery Program address is:
450 Clarkson Avenue, Mail Stop Code 1227, Brooklyn, N.Y. 11203-2098

The program office is in the Health Science Education Building (HSEB), 7th floor, Room 7-043. The phone # is (718) 270-7740 and the Fax # is (718) 270-7634.

Program classrooms are located on the 7th floor HSEB, Room 7-031 and on the 8th floor HSEB, Classroom 8 D/E. Additional laboratory, lecture hall and classroom spaces are used as needed in HSEB, the Center for Healthcare Simulation (CHS), and/or the Basic Sciences Building (BSB).

The SOHP computer lab is located on the 7th floor HSEB, Room 7-045 and additional computer terminals are available for student use in the library.

Program Accreditation

The Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME) <http://www.midwife.org/acme>

The ACME office is located at:
8403 Colesville Road, Suite 1230, Silver Spring, MD 20910

The national certifying organization for individual midwives is the American Midwifery Certification Board (AMCB). The phone number of the AMCB is (866) 366-9632 and the website address is: <http://www.amcbmidwife.org>

This program is registered with and approved by the New York State Education Department. The registration number for the advanced certificate in Midwifery is **12042**. The registration number for the Master of Science in Midwifery is **21570**. The HEGIS code is **1203.10**

Communication with Faculty and Staff

A. Offices and Office Hours

All faculty offices are on the 7th floor. Room numbers are listed below. Faculty work on-site and off-site. When faculty are on campus, their doors may be closed because of building fire regulations. However, the Program philosophy is "Open Door." Students should feel free to knock if you need to speak to a faculty member. If you have something that will take time to discuss or the faculty member is not on campus that day, an appointment is required. Students can make appointments with faculty via e-mail.

B. E-Mail

Downstate E-mail is the official method of communication between students, staff, and faculty. All faculty members and staff check their e-mail with great frequency. Faculty and staff e-mail addresses are listed below.

Midwifery Faculty and Staff Information

Students

1. Student Electronic Mail

All students are given individual e-mail accounts by the University for the duration of their enrollment in the program. **This university e-mail account is the official and *only* e-mail address utilized by the faculty for communication with students. Students are expected to check their Downstate e-mail DAILY, including summer, and as often as possible during all school breaks.**

2. Learning Management System (LMS)

All students have access to the School’s online learning management system. Students will receive training on how to access this electronic system. Students will have access to all course materials through the LMS.

3. Student Clinical Documents

The Midwifery Program uses the Learning Management System to maintain and track all data relating to students’ clinical experiences. Students are responsible for uploading to the clinical courses in the Learning Management System, as instructed by faculty prior to starting all clinical rotations. Documentation needed for clinical placements includes, but is not limited to:

- name and address
- phone number
- updated resume
- current certificate of insurance (student liability, also called malpractice)
- documentation of current outside course work necessary for certain clinical rotations (see later) such as Basic Life Support (BLS), Neonatal Resuscitation Program (NRP), and a fetal monitoring course.

In addition, faculty will utilize The Midwifery Faculty Student folder in OneDrive to store important information that students need:

- faculty advisor/advisee list
- little sibling/big sibling list
- Midwifery Program Student Handbook
- Midwifery Program Clinical Handbook
- Orientation Materials

4. Online Program Calendars

The program utilizes the Google calendar. You will also find a calendar in your online LMS account and its corresponding mobile app, "Pulse". You will learn about both options at Orientation. You will be instructed on how to subscribe to the course calendars so that they can be accessed from your computer and mobile electronic devices. You will be able to access the calendars wherever you are, and updates will be automatically sent to the calendar subscriptions.

Emergency Information

In case of an on-campus emergency, students should call 718-270-2626 for university police and 911. In addition, students are encouraged to register for Downstate's Emergency Alert System: SEND WORD NOW. Information regarding registration can be accessed at <http://downstate.sendwordnow.com>.

In the event of a weather or other emergency, SUNY Downstate has set up a special phone system for students, faculty, and staff. The number is **718-270-1000**. Call just before you start traveling to get the most updated information. In general, information for the day will be provided by 7am, but it might change as circumstances change.

If classes are cancelled for the entire University, you will hear that message and need make no other call (except if you are scheduled for clinical that day—see the third paragraph below). If there have been no changes for the University as a whole, you will hear a standard greeting:

"Welcome to Downstate Health Sciences University and its University Hospital of Brooklyn. If you are dialing from a touchtone phone, press 1. If you are dialing from . . ."

This greeting means the President has not closed the University. However, the School of Health Professions (SOHP) may be closed, or some classes cancelled. You must press "2", and then "4" to get SOHP's individual message number. The faculty will make every effort to have our individual class postings announced on this message number.

If you are scheduled for a clinical area on a day that there is an emergency, you must contact your preceptor to find out whether they will be in. If so, you are expected to be there, with the proviso, of course, that you can make it and it is safe to do so. If you cannot make it in, let the preceptor know when you call. You will be expected to make up the clinical time - every clinical day is a precious gift to you!

Student Services

Services for Students with Disabilities

Students are referred to the current *SUNY Downstate Health Sciences University Student Handbook* for a description of the procedures for requesting accommodations due to temporary or permanent disabilities. Only the Disability Accommodations Coordinator in Student Affairs can determine appropriate and reasonable accommodations. The Office of Student Affairs will confidentially inform the program of the specific accommodation(s) that will be made for any individual student.

Academic Services and Advisement

A detailed description of this service appears in the current SUNY Downstate Health Sciences University (HSU) Student Handbook. All students, but especially those that experience academic difficulties, are highly encouraged to access the Academic Services. At times, the faculty may refer a student to these services. For appointments with an Academic Counselor, please contact Academic Services at 718-270-7536.

Student Counseling Service

A detailed description of this service appears in the current SUNY Downstate Health Sciences University (HSU) Student Handbook. Confidential student counseling is available through the Downstate Health Sciences University Student Counseling Services. **Faculty will not be informed of this service.** Student counseling services are offered via teletherapy (telephone or video-based) to Downstate students in need. Please contact Student Academic Services by email to Ms. Sze-Ying Lee sze-ying.lee@downstate.edu (preferred method) or email the office account at academicupport@downstate.edu

Student Health Service

A detailed description of this service appears in the current SUNY HSU Student Handbook. The Student Health Service provides emergency and ambulatory care to all matriculated students. Its webpage is

[Student Health Center | Student Services | SUNY Downstate Health Sciences University](#)

Services are available by appointment or on a walk-in basis Monday to Friday from 8:00am-4:00pm at 440 Lenox Road, Suite 1-W. The Student Health phone number is 718-270-2018 and in emergencies, students can call 718 270-3166 or 270-4577 for instructions when closed.

Transportation/Shuttle Service

Downstate Health Sciences University provides complimentary van services for students to select subway stations/bus stops and to the parking lots. See University Police section in the HSU Student Handbook. In addition to scheduled pickups, individuals traveling to and from the subways late at night and/or at odd times can arrange to be picked up by calling 718-270-2626. You will need your ID card. For more information and schedule go to: [Transportation & Shuttle Services | University Police | SUNY Downstate Health Sciences University](#)

Financial Aid Information

The Financial Aid Office provides current information about eligibility for financial aid, loans, and scholarships to students. Other external sources of scholarships may be available. You can check the

SUNY Downstate Health Sciences University Midwifery Program Student Handbook 2023-2024

[Financial Aid | SUNY Downstate](#) website for information on Financial Aid. You can also call the Financial Aid Office at 718-270-2488 or email them at financialaid@downstate.edu

Each year a number of external scholarships specific to midwifery are available. Sometimes information about these and others not specific to midwifery is sent to the Program Chair who will then forward this information to students via e-mail. Other scholarships are announced at local midwifery meetings (NYC or LI), or on the ACNM website: www.acnm.org. It is advisable to check this website periodically. New York State Midwives (NYM) also sends emails about scholarship opportunities. You need to be a member of the midwifery professional organization that offers the scholarship.

Additional Student Information

Information about policies regarding review of student records; equitable tuition refund; access to university/college catalogs; and access to academic calendars is available through the Office of Student Life and Services and the SUNY Downstate Handbook. See

The url for the University Handbook is:

<https://www.downstate.edu/education-training/student-affairs/student-handbook.html>

After reviewing the SUNY Downstate Handbook, if you have additional questions or concerns, you can also contact the appropriate office for further information (e.g., Bursar's Office; Office of Student Affairs; Office of the Registrar).

Required Textbooks/Equipment

Faculty will review the required and/or recommended textbooks and equipment for each course in the orientation session to that course. Information about textbooks for the first year is included in the Important Information letter new students receive via email during the summer.

All students should have an up-to-date medical dictionary, such as Stedman's or Taber's (or any other).

Midwifery Student Academic Policies

As students in the Midwifery Program, you are being educated for a profession that relies on its providers to function at the highest level of integrity. Providing care to individuals and families, which you will be doing as a student and for the rest of your professional life, requires honesty, responsibility, trustworthiness, and respect for others. In essence, by attending this program, you are signing onto a lifelong honor code. However, to help you negotiate the academic environment, and to have guidelines should problems arise in your ability to maintain these characteristics or in your ability to perform at the level of excellence required for this program, the faculty has developed explicit policies for both your academic and clinical work in the program. These are detailed in the sections that follow.

The following policies that relate to academic standing and promotion have been reviewed and approved by the Academic Policy Committee of the School of Health Professions. The policies that you are responsible for abiding by are included in the current versions of two documents: this Midwifery Program Student Handbook and the *SUNY Downstate Health Sciences University Student Handbook*.

I. Registration

All students are expected to register online through the Banner portal according to the schedule established by the Registrar's office. Some courses may require faculty approval.

II. Program Length

1. A two-year program of study is designed to be completed in 5-6 semesters
2. A three-year program of study is designed to be completed in 7-8 semesters
3. The MS in Midwifery completion for CMs and CNMs is designed to be completed in 2, 3, or 4 semesters.
4. Due to changes in clinical site availability still related to the COVID pandemic, graduation within these time frames cannot always be guaranteed.

III. Midwifery Programs of Study (tracks)

All students, regardless of track, are required to successfully complete the 40 graduate credit Midwifery program core curricula.

Note: As of 2011, the American Midwifery Certification Board (AMCB) has required a graduate degree in midwifery or a related field to take its national certification exam (that is needed for midwifery practice). Therefore, any student entering the program without a related Master's degree will be required to enroll in the Master's track.

Advanced Certificate Midwifery:

Students registered for the advanced certificate track graduate with an Advanced Certificate in Midwifery upon successful completion of the Midwifery Program core curriculum (40 graduate level credits). Students may enroll in the Advanced Certificate track if they have a Master's in a related field approved by the midwifery faculty.

Master of Science (MS) degree in Midwifery:

Students registered for the Master's track are eligible for a Master of Science (MS) degree in Midwifery upon successful completion of the Midwifery program core curriculum (40 graduate level credits) plus an additional 12 credits that comprise the Master's component.

Certified Midwives (CMs), Certified Nurse-Midwives (CNMs), Graduate Midwives (GMs), or Graduate Nurse-Midwives (GNMs) who register for the Master's Completion program are awarded up to 40 graduate level credits of advanced standing.

IV. Midwifery Curriculum

Two-year and three-year course sequencing is outlined in the following pages for the 1) Master of Science degree in Midwifery and 2) Advanced Certificate in Midwifery. Modified programs of study are available and may be individualized based on a student's progress.

Master of Science Program of Study: 7 – 8 Semesters

All students must hold a current American Heart Association (AHA) Basic Life Support (BLS) certification before beginning courses marked as “clinical,” and hold current certification in neonatal resuscitation (AAP/AHA) prior to taking NRMW 5107 Neonatal Clinical or NRMW 5121 Intrapartum Care, Clinical (may be taken the same semester or not). Students must also take a basic fetal monitoring course with examination before taking NRMW 5120 Intrapartum Care, Didactic.

Total Credit Allocation for the Program: 52/54.5##/54*/55.5*###

* 3 credits of supplemental course for Direct-Entry Midwifery Track (required for state licensure). This course, or equivalent, is required only of direct entry students. The credits for this course are undergraduate level credits and are not included in the number required for the Advanced Certificate or Master's Degree.

*** Either Health Care Policy and Community Assessment, NRMW 5403, or International Women's Health Care Policy, NRMW 5302, satisfies the requirements for the MS degree in Midwifery.

A 1-3 credit independent study (NRMW 5700) may be taken as an elective with faculty permission. Credits for these courses are not included in the number required for the Advanced Certificate or Master's Degree.

This elective must be taken for all 3 semesters. It involves following for observation only one family planning a home birth through all prenatal visits, observing the birth, and following the family up to 6 weeks of the postpartum period. It must be taken for 3 semesters unless the family opts out of care or has transferred to the hospital. Credits for these courses are not included in the number required for the Advanced Certificate or Master's Degree.

+ Courses in the MS in Midwifery Completion program.

SUNY Downstate Health Sciences University Midwifery Program Student Handbook 2023-2024

++ May be taken in one of two designated semesters.

Advanced Certificate Program of Study 5 – 6 Semesters

All students must hold a current American Heart Association (AHA) Basic Life Support (BLS) certification before beginning courses marked as “clinical,” and hold current certification in neonatal resuscitation (AAP/AHA) prior to taking NRMW 5107 Neonatal Clinical or NRMW 5121 Intrapartum Care, Clinical (may be taken the same semester or not). A 1-3 credit independent study (NRMW 5700) may be taken as an elective in either or both of the first two summer semesters with faculty permission. Credits for these courses are not included in the number required for the Advanced Certificate or Master's Degree.

++ May be taken in one of two designated semesters.

V. Attendance/Punctuality

1. Students are expected to attend all on-site and/or virtual scheduled classes, seminars, examinations, competency performance examinations (CPEs), and clinical experiences. In case of illness or emergency, the student must notify the instructor/preceptor by text or e-mail prior to the scheduled class/experience or as soon thereafter as possible.

Students are expected to be on time for all synchronous classes and for all scheduled clinical experiences.

2. Students who are habitually late or absent to class will be counseled by the faculty on an individualized basis. See course syllabi for policies regarding class participation. Students are responsible for learning all course material regardless of class attendance.
3. Students must attend all assigned clinical sessions. Students who are repeatedly late to clinical may be dismissed from the clinical site on that day. Habitual lateness and or absence may result in permanent removal from the clinical site with possible course failure.
4. All requests for non-emergency clinical schedule changes must be approved in advance by the Clinical Site Service Director or designee, or preceptor at the clinical site. The Course Coordinator or Faculty Liaison to the Clinical Site must also be notified. Approval of clinical time requests is subject to availability of clinical experience. Students must make up missed clinical time.
5. Because of issues of health and safety and as a courtesy to classmates and faculty, infants and children are not permitted in class or exams. Nursing people may pump quietly in class or during class breaks. There is a nursing space in the Public Health Academic Building (PHAB).

VI. Evaluation

Completion of the program is based on the achievement of didactic and clinical course competencies. Candidates for graduation must have a minimum cumulative grade point average of a 3.0 (B). There are three types of Midwifery courses---didactic only, clinical only, and combined didactic/clinical. Students must pass all didactic courses or the didactic component of combined didactic/clinical courses with a grade of 80% (B) or better. Students must achieve a grade of Pass in all clinical courses or in the clinical component of combined didactic/clinical courses. Issues related to course failure and other academic and/or clinical problems will be handled as specified in the appropriate sections below. In addition, there are specific policies in each course syllabus that describe in greater detail how these policies will be implemented in that course. If there is nothing more specific in a particular course relating to a policy area, the policies below apply to that course.

A. Academic Evaluation

1. Students are required to take all examinations and Competency Performance Examinations (CPEs) at the time and date scheduled by the Course Coordinator(s). Exams and CPEs will only be rescheduled for illness or extreme emergency at the discretion of the Course Coordinator. If a student misses an exam for other than illness or emergency the student will receive a “0” grade for that exam or failure in a CPE.
2. Examinations may be offered on campus or remotely. Either way, students are expected to be on time for all scheduled examinations and CPEs. Extra time will not be given to latecomers. Cell phones must be turned off during all examinations and CPEs. (For on-campus exams, the proctors will have a cell phone that is turned on in case of an emergency alert being sent out during the time of the exam.) Students are not permitted to wear smart watches during an examination. The only reason that students may leave an examination before they complete the examination is to use the restroom. For on-campus exams, only one student will be allowed to leave the room at a time. The student will turn in examination materials and/or scrap paper to the proctor before leaving.
3. All examinations are given via the Respondus Lockdown Browser. To facilitate off-campus examinations, students will download Respondus Lockdown Browser to their computers. Off-campus examinations will be proctored remotely, and students may be recorded via the Respondus Monitor. Guidelines for these exams will be shared with students at the time of the examination and students must adhere to these guidelines.
4. Examination Integrity Policy:
Examinations are meant to reflect each student’s individual achievement. Infractions of these policies compromise the integrity of the examinations and violate the integrity of the midwifery program and profession. Such violations will result in documentation of the violation in the student’s record and the student is subject to discipline in accordance with the policy set forth in the current *SUNY Downstate HSU Student Handbook*.
 - A. Making whole or partial copies (**including reconstructions from memory**), or delivering, receiving, possessing, posting on the web, or transmitting (electronic or otherwise) any material contained in the examination before, during or after the examination constitutes academic dishonesty and violates the honor code.
 - B. Students should not relay specific examination content to anyone who may be taking an examination at a later date or to those individuals who assist students with examination preparation. Relaying specific examination content constitutes academic dishonesty and violates the honor code.
5. Students are expected to complete and submit all required assignments and/or learning activities by the deadline(s) established by the Course Coordinator(s). A request for approval of an extension of a deadline must be made via e-mail to the Course Coordinator(s) prior to the deadline. Penalties for late work will be at the discretion of the Course Coordinator(s) and published in the course syllabus. When the assignment requires the use of references, either the American Psychological Association (APA) or the biomedical format (as used in the *Journal of Midwifery and Women’s Health*) must be used consistently within the body of the assignment and in the reference list.

6. A cumulative average grade of 80% (B) or higher is required for passing each course. A grade of less than 80% results in a grade of F. This policy is based on the faculty's belief that grades of less than 80% reflect insufficient knowledge for safe midwifery practice and do not reflect satisfactory graduate level work.
7. In courses in which examinations are given, students must achieve an average of at least 80% on the examinations, unless otherwise delineated in the course syllabus. If a student achieves less than an 80% average on examinations, irrespective of how many other components comprise the didactic grade in the course, the student will either fail the course or be eligible for a cumulative re-examination. The students eligible for a cumulative re-examination are those whose average on examinations at the end of the course is 70% or higher.
 - A. The cumulative re-examination will be scheduled by the Course Coordinator(s). The student must achieve at least 80% on this re-examination to pass the course. No matter what the grade on the cumulative re-examination, it cannot be considered for the purposes of the final grade as higher than an 80%.
8. In courses in which there are assignments in addition to examinations that are counted toward the final grade, the final grade will be calculated as noted in the course policies. If the student needs to take the cumulative re-examination, the highest possible grade for the examination component of the final grade will be 80%. If the student's average on course assignments other than examinations is less than 80% and the examination grade, either before or after a re-examination, does not bring this average to an 80%, an appropriate assignment(s) will be developed by the Course Coordinator. The student must achieve at least 80% on this re-assignment to pass the course.
- 8a. In courses in which there are no examinations, students must achieve an average of at least 80% on all course assignments. If a student achieves less than an 80% average on these assignments, an assignment or assignments will be developed by the Course Coordinator. The student must achieve at least 80% on this/these re-assignment(s) to pass the course.
9. Students who fail to achieve 80% (B) in any course, or on the cumulative re-examination and/or reassignments, will receive a grade of F and must repeat the course when it is next offered. When students retake a course, the original F grade is no longer counted in determining their cumulative grade point average (GPA), but the F counts toward the numbers of credits or courses that may be retaken.
10. A student will be allowed to retake any given course only once. Failure on course retake will lead to dismissal from the program.
11. Failure of 6 or more credits and 3 courses will lead to dismissal from the program.
12. Students will not be permitted to take a course for which they have failed any prerequisite course. The following courses have prerequisites and/or co-requisites as indicated (**with exceptions made in special circumstances at the discretion of the midwifery faculty**):

SUNY Downstate Health Sciences University Midwifery Program Student Handbook 2023-2024

*Basic Health Skills = Student Midwives (SMs) only

13. The following are Midwifery Program grade delineations:

- a. A 93-100 (4.0)
- b. A- 90-92 (3.67)
- c. B+ 87-89 (3.33)
- d. B 80-86 (3.0)
- e. F <80 (0)

14. Students who are experiencing academic and/or clinical difficulties are strongly encouraged to meet with a faculty member and develop strategies for improvement. In clinical courses, faculty may develop a learning contract and require that the student meet conditions set forth in the contract. The learning contract is developed by the faculty in coordination with the clinical site. Failure to meet the conditions of the learning contract will result in course failure.
15. The policy of SOHP regarding incomplete (“I”) grades is clearly delineated in the *SUNY HSU Student Handbook*, in the section relating specifically to SOHP. To summarize, an “I” grade is defined as “a portion of the requirements for the course have not been completed for reasons beyond control of the student (e.g., illness).” In addition, the policy clearly states that permission for an “I” grade must be requested from the course instructor prior to the deadline for submission of course grades. The midwifery faculty requires that a student request permission for late submission of any assigned course work before its deadline.
16. A Comprehensive Examination, a summative evaluation of the student's knowledge and ability to apply theory to midwifery management, is given on a set date and time during the Integration of Clinical Studies course. Policies regarding grading of this examination, including policies regarding a re-examination, are available in the course syllabus for NRMW 5405 Integration of Clinical Studies. In addition, students will take a mandatory practice comprehensive examination. Students are able to review, with faculty, areas in which they performed poorly.
17. After completing an examination, students will only have access to that examination at specified times under the supervision of faculty. Students are strongly encouraged to review all their examinations at these designated times. A student who fails an examination is *required* to review the examination with the Course Coordinator(s) or designee, ideally within two weeks of notification of the grade. The Course Coordinator will send the student a list of possible times for reviewing the examination and the student will either choose one of those times to meet with the coordinator or request alternate times for the exam review.
18. Students who are challenging courses through the Midwifery Program Challenge Mechanism option will be given specific policies regarding challenges.

B. Clinical Evaluation (Also see the Midwifery Student Clinical Handbook, section on Clinical Evaluation)

All clinical courses are Pass/Fail.

Some courses require that students pass a Competency Performance Examination (CPE) before students are permitted "hands on" experience in that specific competency in the clinical setting. For these courses, this is noted in the Course Policies and Evaluation Methods section of the Course Syllabus. Prior to the CPE, students will be given information about what is expected to pass. Students must demonstrate satisfactory, safe performance of technical skills and/or procedures in a classroom or lab setting, based on the knowledge of when, why, and how those skills/procedures are to be performed. A student whose performance is deemed unsatisfactory on the first attempt will be counseled, given an opportunity for remediation, and have a second opportunity to demonstrate beginning competence. Inability to pass the CPE on the second opportunity will result in failure of the course.

A student's self-evaluation of clinical experiences must be completed and submitted to the clinical preceptor for review and comments at the end of daily or weekly clinical experiences. Once the clinical preceptor signs the evaluation the student must upload it to the assignment section to the clinical course.

1. **The student must complete both the numeric and comments sections of the self-evaluation form before submitting it to the clinical preceptor. *Substantive evaluative comments on the day's or week's performance are required.*** These should address both strengths and areas for improvement and should reflect a cumulative evaluative approach. A student-preceptor conference immediately following each clinical experience is desirable. Self-evaluation is a critical component of the midwifery learning process.
2. Students will complete a mid-experience and final evaluation for all clinical courses. As with daily or weekly evaluations, students will complete the self-evaluation component of these evaluations before submitting them to their clinical preceptors. The preceptor's component will be completed by an appropriate person at the clinical site(s) at the mid-experience or end of the clinical courses in ambulatory care, primary care, and intrapartum/postpartum care, as well as Integration of Clinical Studies. The student **MUST** schedule mid-experience and final meetings with the designated Faculty Liaison to the Clinical Site.
3. A student whose clinical progress during a course is unsatisfactory will be counseled. The student's unsatisfactory progress, counseling, learning contract and subsequent clinical progress will be documented by a faculty member and placed in the student's program file. The student will have the opportunity to demonstrate improvement during the remainder of the course. In exceptional circumstances special consideration may be given, at the discretion of the faculty, regarding extending the clinical experience. Additional clinical hours *may* be arranged *when and where available before the end of the rotation*. If the student fails to achieve the clinical course competencies by the end of the rotation, the student will fail the clinical component of the course. The final grade that will appear on the student's transcript will be submitted only after successful completion of all course competencies documented by submission of daily, mid-semester and final evaluations. In some cases, a student may only need a few weeks to complete a clinical course or the clinical component of a course and may receive an interim grade (In Progress (IP) or Incomplete (I)) for the course and may have to register (and pay for) an Independent Study (NRMW 5700) to complete the clinical requirements following the end of the semester but before the start of the next semester. If these requirements are satisfactorily met, the student will receive a passing grade in both the Independent Study and original course. Exceptions to this policy may be made on an individualized basis.
4. A student who is unable to meet the clinical competencies of a course fails the course.
5. A student who has completed all course requirements and desires additional clinical experience may request faculty approval to register for an Independent Study course during a subsequent semester, subject to availability of an appropriate clinical site. Independent study credits do not apply towards those required for attainment of the certificate or degree, however students must pass these courses in order to graduate.
6. Once a student begins the clinical course sequence (antepartum; gynecologic,

reproductive, and sexual health; primary care; intrapartum; postpartum; and integration) faculty recommend that there be no gaps other than a summer semester in this sequence of courses. If the student must decelerate or postpone a clinical course, the student must take a *minimum* of a 1-credit Independent Study to continue clinical work. However, this will only be permitted if an appropriate clinical site is available for the student, not to replace a site for a student who needs a site to complete clinical requirements. The Independent Study *will not* count toward the credit requirement for graduation; however, students must pass these courses in order to graduate. If the student must take a leave of absence, a plan will be developed for remediation as necessary in clinical work when the student returns. Students returning from a leave of absence will be expected to pick up course work where they left off and will take necessary courses during the semester when they are otherwise offered.

7. Students who are challenging courses through the Midwifery Program Challenge Mechanism option will be given specific policies regarding challenges.

VII. Leave of Absence

The Program's Leave of Absence and Maintenance of Matriculation policies follow those outlined in the current *SUNY HSU Student Handbook*. The Program Chairperson and the SOHP Committee on Admissions and Academic Standing must approve a leave of absence request.

VIII. Change of Status

- A. A student following a two-year program of study may request a change to three-year status. On occasion, a student in the three-year program of study may request to decelerate and complete the program in a longer time frame. This request must be made via e-mail to the Program Chairperson. An individualized program of study will be developed by the faculty as necessary in order for the student to fulfill the graduation requirements.
- B. Upon recommendation of the faculty and approval of the SOHP Committee on Admission and Academic Standing, a student may be required to decelerate to a modified study program if the student is in academic and/or clinical jeopardy, including probation.
- C. A student cannot change from three-year to two-year status because of the program course sequencing.

IX. Program of Study Change(s)

Changes in the program of study may be recommended by the faculty or requested by a student. The faculty may also mandate such a change (see XI, C. 3). The Committee on Admissions and Academic Standing must then approve this change. A student request for approval of any change in the program of study (e.g., from Advanced Certificate to MS or MS to Advanced Certificate if the student already has a related Master's degree) must be made via e-mail and submitted to the Program Chairperson. A conference may be scheduled to discuss the student's request.

X. Probation

The following probation policies are stated in the current *SUNY HSU Student Handbook*.

1. See the *SUNY HSU Student Handbook for indications for probationary status*.
2. The SOHP Committee on Admissions and Academic Standing will review the student's record and the program faculty recommendation (see above). The Committee will either concur with the suggested plan or decide on an alternative plan of action.
3. The SOHP Dean will consider the recommendation of the SOHP Committee on Admissions and Academic Standing and makes the final decision regarding SOHP probationary status.
4. To remove Probation the student must re-register for, retake, and pass that course in its entirety during the next semester in which the course is given.
Removal from Probationary Status must recommend by on the Committee on Admissions and Academic Standing.

XI. Program Deceleration

1. Indications:

- a. A student who fails a course must decelerate.
- b. A student who fails to achieve a 3.0 grade point average (GPA) either cumulative or in any semester (also SOHP probation) may have to decelerate.

2. Program Faculty Action:

2. **The** student may be allowed to progress to certain subsequent courses, assuming the student has passed the prerequisite course(s).
3. The program faculty and student will negotiate and develop a plan to assist the student to return to good academic standing.

XI. Dismissal

Grounds for Dismissal

1. A student who, in the same course twice, fails to achieve a B or better in didactic courses or P in clinical courses
2. A student who fails to achieve a B or better in didactic courses or P in clinical courses in 6 or more credits and 3 or more courses
3. A student who breaches academic, professional, and/or ethical conduct

Program and School Actions

A student who is subject to dismissal from the program will be presented to the SOHP Committee on Admissions and Academic Standing. The Committee reviews the student's records in light of the program policies and votes to either recommend dismissal or not. The Dean is informed of the Committee's recommendation and will notify the student in writing regarding her/his status in the program and of the right to appeal.

XII. Grievance/Appeal Procedures

See “Student Academic Appeals” and “Guidelines for Resolving Academic Integrity Cases” policies in the SOHP section of the current SUNY HSU Student Handbook. See also Appendix, “Procedures for Processing Grievances Alleging Discrimination.”

XIII. Student/Class Responsibilities

- A. Select a student class representative from your cohort to facilitate faculty/student communication. This class representative will be invited to some faculty meetings, although they will be asked to leave when individual students are discussed. The faculty welcomes input from students at these meetings. It is hoped that the class representative will have communicated with their cohort to get the input/opinions/concerns of the cohort. The class representative should also communicate pertinent issues to other students from these meetings.
- B. Present cohort concerns by the student class representative to the Program Administrator via email no later than 1 week before the faculty meeting. Each student representative will be given a maximum of 10 minutes at the faculty meeting to discuss their cohort's concerns.
- C. Contribute to the evaluation of courses, learning opportunities, and the overall program. Complete all online course evaluations for the courses in which you are registered at the end of the semester. Complete the overall program evaluation upon completion of all program requirements.
- D. Contribute to the learning of classmates by sharing knowledge, experiences, coming prepared and on time for class, actively participating in classes, assisting peers, and demonstrating sensitivity to the learning needs of others. This includes personal hygiene, cleanliness, and attention to modesty.
- E. Share resources. Return all borrowed books and equipment in the same condition in which they were obtained. **The student borrower must replace damaged or lost books and equipment.**
- F. Keep classroom spaces locked and clean. Classroom computers must be turned off, window(s) kept closed, and classroom locked as the classroom is vacated.
- G. Respect faculty members' time and privacy. Although faculty generally have an "open-door" policy and are receptive to meeting briefly with students on an impromptu basis, students are advised to make an appointment to discuss any personal or program-related matter, unless of an emergency nature. Use discretion in time of day chosen when telephoning and texting an academic or clinical faculty member.
- H. Make known to the faculty any specific learning or practice needs, including suggestions for seminar topics, guest speakers, and clinical resources.
- I. Share information with classmates and faculty regarding current literature and/or other references or resources not cited in the course syllabus.
- J. Participate actively in constructive self-evaluation.
- K. Identify academic or clinical learning difficulties and initiate discussion with faculty of plans to overcome these difficulties.
- L. Silence all phones and electronic devices during onsite class, lab practice, exams, and clinical experiences. The faculty phone will be kept on in classrooms in order to receive emergency messages from Downstate. All personal electronic equipment, including laptop or tablet computers may be brought to class for educational purposes only and used only on silent mode. Students should not be disrespectful to faculty, classmates, or guest speakers by using computers during class for game playing, reading, or sending email, online chatting, checking social media sites, or other activities that do not relate to the class. **For safety reasons, all personal computers, tablets and cellphones must be used on battery power only unless the class is taking place in a room that has charging stations by each seat.**
- M. Obtain permission of the instructor prior to audio or video taping any class or review session.

- N. Course materials are for the sole use of students registered in the course. The posting of course materials without the permission of the author is a copyright violation. Reproduction of course material is prohibited without the author's consent.
- O. Discuss academic or clinical conflicts by speaking directly to the faculty member involved. In the event that the problem cannot be resolved at this level, promptly contact the Course Coordinator, Faculty Liaison to Clinical Site, or Faculty Advisor. The Program Chairperson may become involved at the request of the student or faculty. Also, see “Guidelines for Resolution of a Problem During Clinical Experiences.” This document appears in the Midwifery Clinical Handbook.
- P. Immediately report to the course coordinator or clinical faculty liaison, via e-mail or telephone, any untoward incident or poor outcome that occurs in the clinical area.
- Q. Maintain accurate and up-to-date statistics for all clinical experiences and cumulatively for the program by the program’s end.
- R. Maintain accurate academic and clinical records throughout the program in a timely fashion. The purposes of the student statistics and records include documentation for obtaining professional licensure, obtaining required information for program accreditation, and compiling data when requested by the School or University. These should be uploaded to the LMS during each clinical rotations and at the programs end. These will be retained by the Midwifery Program for three to five years.
- S. Purchase student Midwife liability insurance (commonly called “malpractice”) before the beginning of your first clinical rotation. Submit proof of current coverage to the clinical course in the LMS. You cannot begin clinical until you have uploaded your certificate. Renew the policy as needed for the duration of the program.
- T. Submit proof of completion of a basic fetal monitoring course prior to starting Intrapartum Care (IP). This course must have an examination component and be approved for continuing education by ACNM, AWHONN, or for Continuing Medical Education (CMEs).
- U. Complete an American Heart Association Basic Life Support (BLS) before you take your first clinical course(s).
- V. Complete a Neonatal Resuscitation Program offered by the American Heart Association/American Academy of Pediatrics or demonstrate evidence of current certification in neonatal resuscitation prior to starting Neonatology, clinical (Neo) or Intrapartum Care, didactic (IP) (whichever comes first).
- W. Complete the interprofessional IV and Patient Safety courses, when offered, at the Center for Healthcare Simulation (CHS).
- X. Download and/or print all electronic course materials by the end of the semester in which you are enrolled in the course as you may lose online access through the LMS when the course ends.

XIV. Assignments

All formal written assignments must be submitted electronically via the assignment tab or discussion forum in the appropriate course. All assignments must be proofread (use spellcheck and grammar check) with proper format (including citations) prior to submission to the faculty. Faculty also recommends downloading the free version of Grammarly and using it. SUNY Downstate Health Sciences University is developing a policy toward student use of Artificial Intelligence (AI). Until this policy is developed, the Midwifery Program will not accept work that

utilizes AI. The faculty accepts either American Psychological Association (APA) or the biomedical format (as used in the *Journal of Midwifery and Women's Health*) as the reference format.

Specific requirements and policies for written assignments are delineated in each course in which research or other papers are required.

Student presentations in a class or seminar are required in many courses. Guidelines for what is expected, and evaluation criteria are provided for any course in which a student presentation is assigned. Verbal and/or written feedback is given, and a grade may be assigned.

XV. Student E-mail

Your on-campus e-mail address is your official e-mail for communication with faculty. Students must access their on-campus e-mail DAILY. No other e-mail address will be used to communicate with students. Campus e-mail is the most frequently used method for faculty to communicate with students outside of class. The more frequently you check your e-mail, the less likely you are to miss program, course, or other information. Students should continue to check e-mail frequently (weekly is recommended) during the summer and holidays breaks.

XVI. Program Completion

Upon successful completion of all course competencies and all program requirements and having earned a Master's degree or Advanced Certificate in Midwifery, the Program Chairperson will recommend the graduate to take the certifying examination administered by the American Midwifery Certification Board (AMCB). Applications and information about the examination and instructions on registration are available online (www.amcbmidwife.org/). Payment of the examination fee is the responsibility of the student. Students wishing to be licensed in New York State must also contact the State Education Department for information about licensure <https://www.op.nysed.gov/verification-search>

XVII. Graduation Requirements

Graduation requirements are detailed in the SUNY HSU Student Handbook.

All students will have a final conference with a designated academic faculty member to formally complete the Midwifery Program.

XVIII. Honors and Awards

A variety of individual awards may be conferred at the discretion of the faculty at the SOHP Annual Convocation Ceremony or at a Midwifery Program Convocation.

There are also two Midwifery awards chosen by the graduating class. The ***Outstanding Student Leadership Award*** is given to the student who, in the judgment of the graduating class, demonstrates consistent and exemplary leadership in promoting the highest goals of Midwifery care. The other student chosen award is the ***Joni Zavitz Memorial Award for Perseverance***.

XIX. Professional Development

Student membership in the American College of Nurse-Midwives (ACNM) at the local, state, and national levels is expected of all students. National ACNM membership includes a subscription to the *Journal of Midwifery and Women's Health*. Students may apply online for national ACNM membership at <https://www.midwife.org/join-acnm>. Membership in ACNM automatically includes membership in the state affiliate—the New York Midwives (NYM)—if you live in New York State.

Regardless of your address, you can join New York City Midwives as a member of the Downstate community. The New York City (NYC) and Long Island (LI) Midwives can be accessed and joined on-line at <http://www.nycmidwives.org> or <http://www.longislandmidwives.com>.

Local midwifery meetings are held 4 times a year. Students are expected to attend local meetings whenever possible. You will be *required* to attend at least one local meeting and possibly one NYM-sponsored event during the course Professional Issues and Leadership in Midwifery (PILM). Students will be required to attend NYM's Advocacy Day during the course Toward Racial & Social Justice & Equity in Midwifery Practice and Education (RSJ). Frequent attendance at this annual event is highly encouraged. Students are strongly encouraged to attend at least one national ACNM Annual Meeting.

Student Advisement

Faculty Advisor

A list of faculty advisor assignments will be distributed at the Midwifery Program Orientation. Students are responsible for arranging a meeting with their designated advisor a minimum of once each semester.

The role of a designated faculty advisor is:

- 1) to ensure on-going, one-on-one communication with a program faculty member.
- 2) to provide a supportive relationship for discussion of academic and clinical progress, as well as personal issues, as the student desires.
- 3) to serve as a resource and mentor for professional &/or personal matters.
- 4) to assist with problem-solving and in meeting special learning needs.
- 5) to provide a listening ear, a sounding board &/or a shoulder to cry on when needed.

The faculty encourages you to avail yourself of this special relationship with a faculty member. The assignment of an advisor is not meant to limit your out-of-class contact or communication with any/all faculty members. Continue to feel free to meet with any of the faculty as the need or desire arises! Appointments are encouraged. The list of faculty advisors will be distributed at Orientation.

The Midwifery Program Administrator, Niyoka Turnbull, is also available for guidance, advice, or to serve as a sounding board for any student issues or problems that the students do not want to bring to the attention of a faculty member.

Course Coordinator

Please direct your questions/concerns about a specific course to the appropriate Course Coordinator(s). The Course Coordinator(s) are usually best able to address your question and/or provide clarification regarding that course.

Faculty Liaison to Clinical Sites

Liaisons are designated for the clinical sites in Ambulatory Care, Clinical Practicum in Primary Care, Intrapartum/Postpartum/Neonatology and Integration of Clinical Studies. Please direct your questions/concerns about a specific clinical site to the Faculty Liaison for that site because the liaison will usually be best able to address your question &/or provide clarification regarding that facility.

Program Chair

The Program Chair is available to meet with students about any individual student issue or concern or any Program matter.

Faculty Availability

In general, the faculty are available via email, text or telephone or onsite. However, appointments are advisable. Appointments can be made via e-mail (preferred), by telephone, or by stopping in when a faculty member is in the office.
