# Motor Assessment Scale Quiz for Scoring Suggested Items 7 and 8 <br> Answer Key: Check Your Skills Video 

Hand Movements

| Score | Behavior | Pass or Fail | Rationale |
| :--- | :--- | :--- | :--- |
| 0.6 | Mass flexion of fingers gravity <br> eliminated | Pass | Pt. flexes fingers at all <br> digits. |
| 1.2 | Thumb motion at any joint | Pass | Pt. performs thumb motion. |
| 1.8 | Forearm supination | Pass | Pt. supinates forearm |
| 2.4 | Finger mass extension-against <br> gravity | Pass | Pt. exhibits extension at all <br> joints. |
| 3.0 | Wrist extension - against gravity | Pass | Pt. extends wrist and entire <br> palm of hand clears the <br> table. |
| 3.6 | Wrist radial deviation-gravity <br> eliminated | Pass | Even though elbow flexes <br> slightly, the pt. does radially <br> deviate her wrist in relation <br> to the forearm. |
| 4.2 | Wrist radial deviation- <br> against gravity | Pass | Ulnar side of hand fully <br> clears the table. |
| 4.8 | Finger MCP flexion with IP's <br> extended ("intrinsic" <br> action) - gravity eliminated | Fail | Pt. is unable to isolate MP <br> flexion from IP flexion |
| 5.4 | Timed opposition of thumb | Pass | Pt. touches fingers 14X in <br> 10 seconds. |
| 6.0 | Finger MCP Flexion with IP's <br> extended ("intrinsic" <br> action) -against gravity). | Fail | Pt. is unable to isolate MP <br> flexion from IP flexion |

This patient would receive a score of 4.2 for this item. This is the score just below
"Finger MCP flexion with IPs extended", which this woman was unable to perform.

Hand Activities

| Score | Behavior | Pass or Fail | Rationale |
| :--- | :--- | :--- | :--- |
| .75 | Slide paper | Pass | Pt. moves the paper |
| 1.5 | Use remote control | Pass | Pt. depresses a key and <br> makes the light come on. |
| 3.0 | Pick up pencil | Pt. picks up pencil using pad <br> to pad pinch, and then <br> releases it. |  |
| 3.75 | Pick up and place penny in cup | Pass | Pt. picks up and places the <br> penny in the cup (without <br> sliding the penny to the edge <br> of the table) |
| 4.5 | Draw a horizontal line | Pass | Even though the examiner <br> oriented the pencil <br> incorrectly, the pt. picks up <br> the pencil and uses pad to <br> pad pinch to make a <br> horizontal line |
| 5.25 | Timed dots | Fail | Pt. holds the pencil using <br> pad to pad pinch; but only <br> makes 3 dots in the <br> allocated time. |
| 6.0 | Timed horizontal lines | Pass | Pt. holds the pencil using <br> pad to pad pinch and makes <br> 10 lines in the allocated <br> time. |

This patient would receive a score of 4.5 for this item. This is the score just below "Timed dots", which this woman was unable to perform.
