

#### I. INSTRUCTIONS

The APEx presents a valuable opportunity for students to apply the didactic knowledge gained in MPH coursework to a real-world public health issue. Students are eligible for the APEx after completing five of the six MPH cores: BIOS 5200, CHSC 5206, EOHS 5200, EPID 5200, and HPMG 5206. Students are expected to work closely with their preceptor and faculty advisor to ensure the APEx benefits the practice site and complies with requirements. As such, the following information outlines expectations, roles, and responsibilities of each participant.

		A

#### VI. APEX PROPOSAL

Choose five (5) competencies total and the two (2) work products that will be created which demonstrate mastery of that competency/competencies. Provide contextual details about how the product fits into the overall project goal. Each work product can correlate with 2-3 of the chosen competencies. It is also acceptable for a final work product to relate to more than one competency; however, the described association between the competency and final product must be unique.

APEx Project Title (approx. 1 sentence)		
Brief Summary of Proposed Project, including student's role (approx. 3-5 sentences)		
APEx Competencies- at least <b>five (5)</b> total; at least three (3) must be foundational. Remaining two can be foundational or concentration-specific		
Proposed Work Product #1:		Proposed Work Product #2

### MPH Foundational Competencies (22 Total):

#### Evidence-based Approaches to Public Health

- 1. Apply epidemiological methods to the breadth of settings and situations in public health practice
- 2. Select quantitative and qualitative data collection methods appropriate for a given public health context
- 3. Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software as appropriate
- 4. Interpret results of data analysis for public health research, policy or practice

#### Public Health & Health Care Systems

- 5. Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings
- 6. Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels

#### Planning & Management to Promote Health

- 7. Assess population needs, assets and capacities that affect communities' health
- 8. Apply awareness of cultural values and practices to the design or implementation of public health policies or programs
- 9. Design a population-based policy, program, project or intervention
- 10. Explain basic principles and tools of budget and resource management
- 11. Select methods to evaluate public health programs

#### Policy in Public Health

- 12. Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence
- 13. Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes
- 14. Advocate for political, social or economic policies and programs that will improve health in diverse populations
- 15. Evaluate policies for their impact on public health and health equity

#### <u>Leadership</u>

- 16. Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making
- 17. Apply negotiation and mediation skills to address organizational or community challenges

#### Communication

- 18. Select communication strategies for different audiences and sectors
- 19. Communicate audience-appropriate public health content, both in writing and through oral presentation
- 20. Describe the importance of cultural competence in communicating public health content

#### Interprofessional Practice

21. Perform effectively on interprofessional teams

#### Systems Thinking

22. Apply systems thinking tools to a public health issue
