Dr. Michael Stubblefield is Assistant Attending Physician at the Memorial Sloan-Kettering Cancer Center as well as Assistant Professor in the Department of Rehabilitation Medicine at Weill Medical College of Cornell University. He specializes in the evaluation and treatment of neuromuscular, musculoskeletal, and functional complications of cancer and cancer treatments, such as surgery, radiation, and chemotherapy. Among Dr. Stubblefield's clinical interest is radiation fibrosis syndrome, a compilation of interrelated painful and disabling disorders resulting from radiation therapy that may include muscle spasm, weakness, sensory abnormalities, and contracture.

The New York Society of Physical Medicine and Rehabilitation (NYSPMR) is a non-profit professional organization dedicated to the advancement of the specialty of Physical Medicine and Rehabilitation (PM&R) through improving education and public awareness of our field. Rehabilitation medicine, or physiatry, is a medical specialty that advocates the process of restoring function to individuals who have been disabled as a result of a disease, inherent disorder, or injury.
