

The Division of Kidney Transplantation
presents

Breaking Barriers to Transplantation: from Listing to Follow-up

PROGRAM DIRECTORS

Dr. Caroline Rochon

Chief of Transplantation Surgery,
Associate Professor of Surgery

Dr. Mariana Markell

Medical Director, Kidney Transplantation
Professor of Medicine

ABOUT THIS EVENT

This hybrid symposium is designed to address topics important to practicing providers, the general public and patient groups.

Kidney Transplant is a continuously evolving field, and health providers are expected to keep up with new therapies and changing regulatory issues as well as impediments to care and how to overcome them.

Seeking and receiving organ transplants require a significant amount of personal and societal resources. Patients with severe and potentially fatal illnesses have to navigate the complex medical evaluation required before a transplant. This meeting will focus on barriers from pre and post periods.

This activity has been approved for AMA PRA Category 1 Credit™
