ABOUT THIS EVENT

On National Caregivers Day, SUNY Downstate proudly celebrates our first annual Downstate Caregivers Day to honor those who care for patients here and those who care for family members at home.

We recognize the compassion, resilience, and quiet strength of caregivers across our community. This gathering acknowledges our colleagues who serve on the job and those who carry caregiving responsibilities beyond the workplace.

Join us for a heartfelt moment of appreciation, a group photo, wellness activities, and resource tables offering information, benefits guidance, and community support. **We will also debut a specially designed commemorative pin recognizing the dual roles so many in our community carry with pride.**

You show up for others every day. Today, we show up for you.
