324 Winthrop Street Parking Lot – National Grid Work
Starting August 24, 2020, National Grid will be digging at the 324 Winthrop Street parking lot. As a result, temporary closure of a quarter of the lot will occur until work on all four sections of the lot has been completed.

- Each section of the lot is expected to be closed for approximately 2-3 weeks.
- The entire project is expected to be finished during the first week in November 2020.
- As National Grid works on a particular section of the lot, temporary fencing will be installed to cordon off the area making that section inaccessible.
- Once work is finished on one quarter of the lot, the temporary fencing will be removed, the section will be reopened, and work in another section will begin. Approximately 90 spaces will be inaccessible at any time.
- The handicapped parking spaces, attendant booths and center access route will all remain accessible during the duration of the project.
- Daily parkers and parkers with monthly access at the 324 Winthrop Street location will continue to self-park on a first come, first serve basis. If the lot reaches capacity on any given day, the parking attendants will direct cars to other parking locations, if spaces are available.

National Grid will be working on weekends to minimize the inconvenience to the campus, and we appreciate your cooperation and understanding during this time.
