Major NYC Roadway Work: Clarkson Ave between New York & Nostrand Aves Starting Tuesday Feb 9, 2021

On Tuesday February 9, 2021 NYC will begin an urgent major Sewer Reconstruction Project on Clarkson Ave between New York and Nostrand Aves. A sewer line collapsed, adversely impacting all buildings on that block. The project includes trenching, coordinating all undersurface utilities, new sewer line installation, followed by cementing the roadway bed, then final repaving. Work is weather dependent, and project is anticipated to take in excess of one month to complete.

As with any such necessary NYC roadwork, anticipate there will be periodic traffic detours and congestion in the area for the duration of the project and plan accordingly, with an extra dose of patience and cooperation.

Monthly Parkers at the 329 Clarkson Ave Garage: Access will continue to be available to monthly parkers throughout the construction period. However, at certain times of the day, if normal front Clarkson Ave entrance is inaccessible, parkers will be required to use the rear entrance on Parkside Ave. Any needed updates will also be posted on the Monthly Parking webpage (link)
