PURPOSE:

Audit the Timeliness of Calling a Critical Value on Inpatients Only.

GOAL:

To ensure that critical values are called in a timely manner to a responsible health care provider so that action may be taken in a very short period of time. A critical is result to be communicated within 15 minutes of its availability.

SCOPE:

Chemistry, Hematology and Microbiology employees.

DEFINITIONS:

Critical Value: A value at such variance with normal as to represent a patho-physiological state which is life threatening unless some action is taken in a very short time and for which an appropriate action is possible.

Responsible Health Care Provider: MD, RN, NP or PA

PROCEDURE:

- Call and document and read back all critical values as per UHB Laboratory Policy: Calling a Critical Value. (LAB-7)
- On the fifth day of every month data will be collected regarding the timeliness of calling an inpatient critical value using data from the Cerner LIS.
- This information will be submitted to the University Hospital Performance Improvement Department and used to monitor compliance with the JCAHO National Patient Safety Goal: Improve the Effectiveness of Communication Among Caregivers.
- The data will be discussed.
- Responsible services will be informed of the outliers and are required to initiate corrective actions when applicable.
