

The Master of Public Health (MPH) in Biostatistics at SUNY Downstate School of Public Health

WHY choose Downstate for your graduate degree in biostatistics?

FLEXIBILITY

- Take classes on a part-time basis, allowing full-time employment while advancing through the program
- Most classes offered once per week in the afternoon or evening
- Enroll as a matriculated student in summer or fall semester, or year-round as a non-matriculated student

LOCATION

- The School of Public Health is located at Downstate Medical Center, the only academic medical center in Brooklyn
- The School has close ties to the surrounding community and has a unique focus on major public health issues affecting urban and immigrant populations
- Nearby public transportation provides easy access to Manhattan and surrounding communities

ACADEMICS

- Applied statistics courses that are highly relevant to your career, including categorical data analysis, regression analysis, survival analysis, statistical computing, and other advanced topics
- Courses in community health sciences, environmental and occupational health sciences, epidemiology, and health policy and management are also available through the School of Public Health's other graduate programs
- Collaborate with faculty that are experts in Geographic Information Systems (GIS), cancer and infectious disease epidemiology, clinical trials, and other areas of applied research

VALUE

- All of the degree programs at SUNY Downstate School of Public Health are fully accredited
- Tuition is just \$432 per credit for in-state students, and scholarships are available
- Demand is high for new masters graduates in biostatistics, with local starting salaries around \$80,000/year
