

Heterogeneity in Alzheimer's Disease: Course, Neuropathology, and Race

Carl I Cohen, MD

Abstract

This presentation will discuss the following topics: (1) Heterogeneity in course trajectories and neuropathology in Alzheimer's disease(AD); (2) Racial differences in the prevalence, neuropathology, neuropsychiatric symptoms, and caregiver burden in AD; (3) The research potential of focusing on the various types of cognitive states using clinical, biological, and sociocultural indices.
